the COIN DEALER newsletter

. . . a Monday morning report on the Coin Market

Vol. XX No. 1 | January 8, 1982 | Single copy price: $2.50

MARKET COVERAGE EXPANDED WITH THIS ISSUE

Prices Continue To Drift Lower As Bargain Hunters Dominate Bidding

The Market in Depth

ALLEN HARRIMAN

This initial issue of 1982 includes several important additional price listings. First, further MS-63 sections have been added to page two---now covering both the early Jefferson and Washington singles along with the same for the 1932-D & S quarters and the $50 Panama-Pacific "slugs". Probably the most regularly useful of these particular bid/ask listings will be those for the 1934-40 Washingtons. Very strict grading standards have placed more specimens in the choice MS-63 category---and thus this additional price column will be helpful in determing the value of those "almost there" pieces.

Page three carries a number of additions. The most important will certainly be the new listings for 1979-S "type two" proof rolls---cents thru halves. (The dollars, of course, have been added to the appropriate section on page six.) Though trading in the "type two" proof set and corresponding rolls has been relatively quiet in recent weeks, there is no doubt that activity will pick up again in the future. Meanwhile, adjustments in the exact bid/ask ranges for the individual rolls is to be expected. These rolls are still somewhat volatile---and the occasional teletype bids monitored often vary considerably. And, in order to make CDN roll listings as comprehensive as possible, we have added all of the 1965-67 "special mint set" issues in separate rows of their own. The smaller denominations in this group have appeared on teletype buying and selling messages from time to time---and now specific prices will be available each week. Near term adjustments are also likely for these seldom traded rolls.

However, the most extensive of our latest additions will be found on page four. The "G/VG" column of the circulated type coin chart has now been broken down into two separate pricing columns. Generally the low priced common type coins are bid for in "good and better" condition---with little attention paid to the VG's. But, individual prices for Good and Very Good specimens of the higher priced material will be another welcome expansion to the CDN's coverage of the overall market. These earliest of U.S. coins do increase substantially in value from Good to Very Good condition---and thus it will now be an easier task to determine the value of any individual example.

And, it might be mentioned that even more comprehensive expansions and additions to the Monthly Summary are already "in the works". The numerous requests from subscribers for specific additional price listings have been filed and tabulated---and we are certain that everyone will be pleased with our latest endeavors to keep up with the ever changing market. We won't go into more detail here---but suffice it to say that there are a number of timely and very useful new sections coming your way in the greatly revised January issue!

Meanwhile, the coin market in general has remained relatively quiet over the holidays just concluded. Ask prices continue to be edged lower in many areas as dealers try to encourage sales. However, the "10% off bid" attitude still prevades the bidding---and so sales have been light at best. It should be added that a number of dealers have expressed optimism for the coming early months of 1982. Let's hope this is translated into increased activity!

This Week's Market

CENTS: Occasional attempts to locate small quantities of lower grade half-cents and large cents continue to be monitored---with bids all within current ranges. The 1859 Indian cent remains on "want lists" at $1400 in MS-65; this is a tough one to find in gem condition. The 1934-to-date BU Lincoln rolls are virtually unchanged---in very light trading.

NICKELS: With the exception of a slightly lower bid/ask range for the rather easily located 1937-P roll (now $800-$870) and the 1937-D (at $1100-$1200), the Buffalo nickel "short set" issues are attracting very little attention at the moment. Strictly choice rolls of all but 1937-P and 1938-D, however, are actually few and far between. Activity in the Jefferson series is still minimal---with a bargain-hunter noted from time to time.

A number of minus signs will be found on the page four type coin chart this week---mostly among the MS-60 and MS-63's. However, both the "no cents" Liberty nickel and the 1913-P "type one" Buffalo are lower in MS-65 condition.

DIMES: Quite a few BU Mercury rolls have been offered at lower prices during the past several days. These offerings include all of the 1939-45 S-mints---along with 1939-P, 1940-D and 1945-D. Bid, on the otherhand, remains relatively firm for the P-mints in a $475-$500 range. Changes among the Roosevelts include higher bids for 1946-S, 1955-D, 1956-P and 1957-D; lower prices have been recorded for 1946-D, 1950-PDS, 1953-D, 1955-P and 1958-D. The complete 1946-64 BU roll set is steady at $8500 bid.

In "type", the "legend obverse" Seated Liberty dime is a bit lower in all three uncirculated grades---and the 1873-74 "with arrows" versions remains "impossible" at $3900 bid (in strict MS-65, of course).

QUARTERS: A few more minus signs will be found scattered among the MS-60 and MS-63 type listings as the search for "top quality only" specimens continues to dominate most areas of the market.

Lower bid/ask prices have been registered for four Washington rolls: 1941-S ($1250-$1365), 1943-P ($365-$400), the often popular 1946-S ($230-$250) and 1947-D ($300-$325). Few dealers seem interested in this series at the moment.

HALVES: The "common" P-mint Walking Liberty issues have slipped back slightly. Actually, not very many rolls are being offered for sale---but potential buyers seem determined to pay even less. A surprising number of earlier Franklin rolls have appeared on the market in recent days---most of them with lower price tags. And in this area, too, the majority of bidders fall into the bargain-hunting category.

DOLLARS: Strictly gem MS-65 Morgan and Peace dollars remain basically quite firm at current levels---with the additional strength of at least one dealer's attempts to locate quantities of numerous dates at slightly over bid. The out-of-favor MS-60 and MS-63 specimens, on the otherhand, continue to edge lower here and there. A few small gains will be found among the BU rolls; see page six.

PROOF SETS and MINT SETS: Efforts to buy strictly top quality 1936-42 proof sets are mostly unsuccessful. Most of the sets available exhibit problems of one sort or another---spots, hairlines or handling marks. A few prices have drifted lower among the later sets---and "bargain priced mixed lots" continue to appear across the teletype circuits. By the way, bidding for the 1979-S "type two" set is fairly active---and ranges from an optimistic low of $58 or so to as much as $70 on occasion.

COMMEMORATIVES: The relatively short selling lists of silver commems that are seen from time to time attract very little buyer attention. Thus, a few more issues have recorded lower bid/ask ranges. Interest remains evident for the eleven gold issues although bids remain at recent levels; virtually no properly graded pieces are available.

U.S. GOLD: (Prices are for the most common date of eech type.) Bullion related gold coins in this issue ere figured on a basis of gold et $404.30 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch, 2 col. inches max.

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

Vol. XX No. 2 | January 15, 1982 | Single copy price: $2.50

F.U.N. SHOW REPORTS MOSTLY OPTIMISTIC

Numerous "Wonder Prices" Recorded For Top Quality Material

The Market in Depth

ALLEN HARRIMAN

The majority of the reports coming in from individual dealers about the just concluded F.U.N. Show in Orlando have been of a generally "positive" nature. This isn't to say, of course, that convention activity could be measured in terms of 1979 or early 1980---but, on the otherhand, a number of attending dealers stated that this had been "their best show" in well over a year. Yet, to be accurate, there were others who saw "little improvement" over recent months and whose sales left much to be desired. However, the overall impression was one of "cautious optimism"---something which has been lacking for quite a while now.

A substantial number of "wonder prices" were realized by "wonder coins"---both in bourse floor dealer-to-dealer trading as well as at the auction which was conducted by New England Rare Coin Auctions. First "on the floor": an 1861 "no motto" $5 gold piece in MS-67 changed hands between dealers several times---finally at $7100; and 1893-O Barber quarter, again in MS-67, traded at $8000; a gem prooflike 1903-O Morgan - $1600; a gem 1922-S Peace dollar - $1200; and a 1936-D San Diego in MS-67 at $650.

Among the numerous auction highlights: an 1884 Seated Liberty dime described as "MS-69" brought $4400 (!); a 1919-S Mercury in "full bands MS-68" sold for $8250 (!); and 1885-P Morgan in prooflike MS-67 - $630; an Antietam commem in MS-67 - $1150. Several of the Franklin halves in the auction "went crazy"---some examples: 1948-P "full bell lines" MS-67 - $210; a 1949-S described as "MS-69 with full bell lines" sold for $1100 (!); a 1950 in proof-67 condition - $935; a 1951-S "full bell lines" MS-67 - $265; a 1955 in proof-67 - $210 and two 1959 proof-67's brought $440 and $465!

On the not-so-bright side, most of the circulated early type material did not fare nearly so well. From the half-cents thru the rare 1796-97 half dollars (several of which were included in the auction), the prices realized were often considerably below estimates. Thus numerous price adjustments will be found on this week's page four charts which cover the corresponding areas of the market. Actually, these adjustments do seem to be more or less in line with those which have been previously recorded in other areas.

And meanwhile, on the teletype circuits, activity has been somewhat limited due to the absence of the many dealers who were attending F.U.N. Thus there is little out of the ordinary to report. It does appear, however, that the number of "bargain hunters" has dwindled a bit---with more bidders now willing to "pay bid" rather than constantly lowering their offering prices. There has even been the occasional complaint that particular material isn't as forthcoming as it should be! The next few weeks could well prove to be interesting ---and important---for the coin market in general.

This Week's Market

CENTS: Lengthy buying lists for late BU Lincoln rolls are appearing once again; most of the bids are at current levels---but here and there a few prices have been edged higher. Quantities are wanted. In contrast, the occasional pre-1955 rolls which appear for sale are usually listed at slightly lower levels.

NICKELS: A few more lower bid/ask levels have been recorded in the MS-63 type coin column---affecting the "type one" and "type three" three-cent silver pieces and the "no rays" Shield nickel. In addition, the Shield nickel in MS-65 condition is now pegged in a lower $1050-$1175 range.

The 1937-PDS Buffalo nickel rolls have also slipped a bit further---with respective bids of $775, $1000 and $1100 now in force. Activity in the Jefferson series remains minimal---with scattered pre-1965 issues along with most of the S-mint proof rolls being offered at "discount prices".

DIMES: Lower bid/ask ranges have been registered for the 1934-38 Mercuries which are listed as "singles" in the roll chart (page two). It should be remembered that these prices are <u>not</u> for MS-65 "full bands" specimens---prices for these appear in the regular MONTHLY SUMMARY chart. Except for another plus sign for the 1946-S roll (bid now $180), this week's numerous minus signs among the later silver issues is due to lower bullion levels. And, in addition, the S-mint proof rolls are mostly available at lower prices.

QUARTERS: A few of the earlier Washington singles are a bit lower this week in gem MS-65 condition---1934-D, 1935-D 1939-S and 1940-D. And, as with the nickels and dimes, the S-mint proof rolls have been included on recent selling lists at reduced price levels---along with the bullion-related late silver issues.

Both the "no motto" and "with motto" Seated Liberty halves have edged lower in MS-60 and MS-63 condition. Strictly gem MS-65's, however, are not easy to find at current bid levels (although coins optimistically described as such are encountered rather frequently).

HALVES: The Walking Liberty issues are unchanged in light trading. It should be mentioned, however, that finding <u>strictly</u> MS-65 singles is still not an easy task. After last week's rather extensive rash of minus signs, only a few Franklin rolls have been lowered this week---1952-S, 1953-P, 1957-P and 1959-P. Quantities of common date rolls are still needed at $110 per.

The Kennedy series, however, has registered quite a number of lowered ask prices---see page three.

DOLLARS: Bid/ask levels continue to edge lower in both the MS-60 and MS-63 columns as dealers concentrate on "top quality only" specimens. Demand for strict MS-65's is still much in evidence and at least one major bidder is willing to pay "over bid" for quantities. It should be added that <u>gem</u> silver dollars were certainly among the top sellers at the recently concluded F.U.N. Show.

PROOF SETS and MINT SETS: Adjustments in these areas are again numerous---and in both directions. Many dealers frequently run buy and sell teletype messages---and sales are moderate. By the way, gem examples of the 1936-52 sets are still few and far between; several dealers are interested in acquiring these issues.

COMMEMORATIVES: Prices have remained static for both the silver and gold commems throughout the week. Bidding is very light—and transactions few and far between. It must be added, however, that gem MS-65 gold commems are definitely <u>not</u> readily available.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $386.20 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MS-65 MORGAN & PEACE DOLLARS REGISTER FURTHER GAINS

Changes Minimal and Trading Light in Remainder of Market

The Market in Depth

ALLEN HARRIMAN

Silver dollars have once again captured a major share of the week's action---that is strictly graded MS-65 singles. The page six charts are peppered with another rash of plus signs---and, this week, the MS-65 prooflike Morgans have gotten into the act. At this point there are three regular teletype bidders who are in the market for quantities of virtually any date in either series---and they all readily admit that they are "fussy buyers". Nothing short of full MS-65 will bring the strong prices being offered.

Many shipments of dollars are being sent to these current bidders---and, apparently, they range widely in quality. Reports from those who are bidding indicate that they are sometimes able to keep 80% to 90% of particular shipments---while managing to keep even one or two coins out of other packages is difficult. However, it must be added that many coins have been purchased at these new bid levels (and higher)---and at a large dollar value.

Some very interesting bids have been appearing across the teletype circuits during recent days---bids for the numerous overdates and varieties in the 1807-1836 Bust half dollar series. We are confident that the following complete list of these bid levels will be useful to many of our readers:

DATE				
1807 - 50/20	$ 50	$ 95	$ 200	$ 400
1807 - lg. stars	80	140	260	525
1807 - sm. stars	100	175	325	700
1808/7	42	80	150	270
1811/10	40	70	130	250
1812/1 - sm 8	45	80	140	275
1812/1 - lg. 8	350	450	1050	Quote
1813 - 50C/UNI	50	100	160	300
1814/3	45	80	140	275
1814 - E/A	50	90	150	275
1815/2	800	1250	1500	2300
181.7	45	80	140	275
1817/3	125	250	350	800
1817/4 (Very Rare!)	1500	2500	4000	Quote
1818/7	30	42	100	160
1819/8	32	44	105	175
1820/19 - Curl 2	45	85	140	225
1820/19 - Sq. 2	60	110	180	300
1820 - Curl 2	60	110	180	300
1820 - Sq. 2	45	85	140	225
1822/1	70	100	200	350
1823 - Broken 3	50	85	150	250
1823 - Patched 3	45	75	125	225
1823 - Ugly 3	40	70	110	200
1824/1	38	65	100	190
1824/4	36	60	95	175
1824/2/0	40	70	120	220
1827/6	38	65	110	210

Many of these bids are well over current "Redbook" listings---actually up to double---so it might be a good idea to check over your own Bust halves to see what you might just have!

By the way, the greatly expanded January issue of the MONTHLY SUMMARY will accompany next week's mailing. A number of important new features will be added---watch for it!

This Week's Market

CENTS: Trading among the earlier BU Lincoln rolls remains very light; a few prices have again drifted lower. However, strong demand for quantities of the late dates is still evident even though bidders are sticking to current bid levels. The elusive 1975-S proof roll is higher this week at $385---and the 1977-S has edged forward a bit (now bid $115).

In "type", bid levels continue to drift lower for a number of issues---see page four.

NICKELS: The Buffalo nickel rolls now seem to have settled down---but trading is still light and sporadic. Actually, finding almost any of the pre-1937 rolls is usually quite a task---especially if truly choice material is needed. The Jeffersons are unchanged and very quiet. The low mintage 1950-D roll trades occasionally within the present $275-$300 bid/ask range.

DIMES: Quite a number of minus signs will be found scattered across the Mercury dime chart---affecting the 1934-38 P-mint rolls along with 1938-S, 1939-S, 1940-PDS, 1941-S and 1943-D. Most of the bidding in this area is still mostly centered around the common 1941-45 P-mint rolls. Several small gains have been registered by the Roosevelts---on the plus side are: 1946-P & S, 1949-P, 1955-P and 1957-D.

Three advances have been recorded in the MS-65 column of the type coin chart (page four): large size Bust dimes - $7100, small size Bust dimes - $5800 and the 1873-74 "with arrows" Seated Liberty dimes - $4000.

QUARTERS: A couple more of the early Washington singles are slightly lower in MS-65 condition--1938-P at $140 bid and 1939-D at $90; several adjustments have also been made in the MS-60 and MS-63 columns (page two). The Washington rolls remain virtually unchanged---with only an occasional bidder needing a specific roll or two.

The "type one" Standing Liberty quarter is lower in both MS-63 and MS-65 "full head" condition---respective bids are now $550 and $1350.

HALVES: Prices are thoroughly mixed for the pre-1940 Walking Liberty singles. On the plus side of the ledger are: 1935-P, 1936-P and 1937-P (all wanted in quantity)---on the lower side are: 1934-P & S, 1935-D & S, 1936-S, 1937-D & S, 1938-P and 1939-D. The 1941-47 "short set" rolls are unchanged in light trading. It should be noted that there is considerable interest noted for all singles in this group in strict MS-65 condition. (The latest bids will appear in next week's MONTHLY SUMMARY.) A few more prices have edged lower in the Franklin series: 1949-S, 1952-D, 1954-P & S, 1958-P and 1959-D.

Two gains have been noted among the MS-65 type coin issues: the "reeded edge" Bust half is now bid at $5900 and the 1973-74 "with arrows" Seated Liberty at $5950. Both are very tough!

DOLLARS: Silver dollars in very strict MS-65 and MS-65 prooflike condition are very strong---and the phrase "very strict" is not used lightly. Check page six for the numerous plus signs in both the Morgan and Peace series!

PROOF SETS and MINT SET: Only small adjustments continue to be made in these areas. There are many buyers and sellers---and they are often only a few cents apart in their attempts to consummate actual sales. The 1979-S "type two" proof set remains quite volatile; several bidders want quantities at widely varying prices. Thus, pinpointing this week's $69 bid was rather difficult.

COMMEMORATIVES: Again only a few scattered price changes have been recorded (all on the lower side). Trading remains light. It should be added that several potential buyers have complained that locating "real MS-65's" is not as easy as static prices would indicate.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $375.80 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

DOLLARS AND TYPE SCORE FURTHER GAINS

Major New Charts Added To "Monthly Summary" In Enlarged Twelve-Page Format

The Market in Depth

ALLEN HARRIMAN

Readers will certainly notice immediately that major additions have been made to the enclosed January issue of the regular MONTHLY SUMMARY. With this initial issue of 1982, a new twelve-page format has been adopted---affording the considerable amount of space needed for the following important new pricing charts:

First, page three now carries two entirely new bid/ask charts covering U.S. gold coins. Early gold type coins from the 1796 $2½ through the 1838-39 $10 issues are now priced in all grades from Fine to MS-65. And, in addition, Proof gold by type is now listed in MS-60, MS-63 and MS-65 condition. All of this, in addition to the regular coverage of the twentieth-century issues by date and grade will now assure readers of the most accurate, up-to-date and comprehensive gold market coverage available.

Then, interspersed with our regular charts covering the various copper and silver denominations by date and grade, we have now added all dates and grades in the Two-cent series as well as both the Three-cent nickel and Three-cent silver series. These three areas have become increasingly popular during the past year or so---and we are certain that this additional pricing information will be of considerable value to many of our subscribers.

Another very important addition---and one that we feel will be most welcome---is the entirely new bid/ask chart covering Franklin half dollars. This chart not only includes prices for all MS-63 and MS-65 singles---but also gives the sought after information regarding the value of MS-65 "full bell lines" specimens! We have no doubt that this will be among the most popular of all the new additions.

Following the new Franklin half dollar listings is an another all new bid/ask chart. This one covers MS-65 proof single coins from 1936 through 1964. Certainly this new chart will vie with the Franklin listings as the most useful of the new charts. And, it should be added, specific prices in this chart have been particularly difficult to pinpoint due to the widely varying buy and sell prices monitored across the teletype circuits during the past few months. Adjustments within the next few issues are inevitable as dealers settle down to a more narrow and orderly trading range.

It should also be noted that the familiar circulated rolls chart is now located on the last page of the issue; coverage is unchanged.

And one final note---though it may not be apparent at first glance, two further additions have been made. First, the Lincoln chart now includes all dates from 1909 through 1933. The numerous requests for these additions have been heeded and we know that these new listings will be useful to many. Second, MS-63 columns have been added to ALL the charts from Flying Eagle cents through the new Franklin chart! With the spread between MS-60 and MS-65 becoming ever wider, these additional MS-63 listings have, become increasingly important.

We hope---indeed, we are confident---that our subscribers will be very happy with these latest efforts to offer the most comprehensive accurate market coverage available. With the general market now appearing to be "bottoming" in most areas---and with the prices for MS-65 silver dollars and type coins continuing to advance---we look forward to an up-beat 1982!

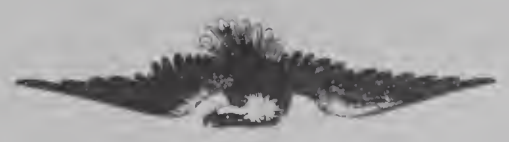
This Week's Market

CENTS: BU Lincoln rolls are becoming active. Several bidders are in the mood to buy numerous dates and plus signs range from the 1934-D thru the 1976-D. It should also be noted that several bidders are in the market for "Gem" 1934 to 1942 singles a prices well over pro-rated bid levels. Elsewhere, MS-65 half cents and large cents are bid at slightly higher levels. Ditto the very scarce 1859 Indian cent and the sometimes surprisingly tough Proof Indian cent.

NICKELS: This week was fairly quiet in the BU roll area, though a few war nickels were bid at higher levels. Bid for the complete roll set has moved up to $10,000.

DIMES: BU Mercury rolls were basically unchanged this week. Roosevelt rolls, on the other hand, were much more active. Gainers included the 1946-S (now bid $190) and the very scarce 1949-P (bid $900) and 1949-S (bid $1950) rolls. Several of the rarer type coins advanced again this week. Large size Bust dimes are bid $7200 in MS-65 condition; small size examples are now wanted at $5850, and the elusive 1873-74 arrows is now bid $4100.

QUARTERS: Washington quarters were the quietest area of the BU roll market last week. There were a few minor changes in the early Washington singles (See page two). In the type market, both large size Bust quarters and Barber quarters are bid slightly higher in MS-65.



HALVES: Several bidders are in the market to buy MS-65 1941 thru 1947 Walkers. Check this month's Summary for the new, higher bid levels. Franklin and Walker rolls were relatively quiet though there are a few bidders at or near current levels. Type halves were not left out of the recent type market advances. The rare 1873-74 arrows half led the way at a higher bid of $5975.

DOLLARS: A very impressive round of gains for MS-65 and MS-65 prooflike dollars this week. Check out the plus signs on page six! Once again, it should be noted that there are several buyers at the higher levels, the buyers want quantities of all dates, and the buyers demand strictly graded coins. Significant gains (both plus and minus) include:

- 1879-P wanted by numerous bidders at a higher $400
- 1880-CC, 1881-CC, & 1885-CC - bids dropping in MS-60 and MS-63 as these appear to be very available. However MS-65 examples are suddenly elusive and buyers have raised bids accordingly.
- 1886-O drifting lower in MS-60 thru MS-65. This is the "easiest" of the rare O-mints.
- 1902-O bid at a higher $232. This is possibly the most wanted MS-65 dollar at present.

PROOF SETS and MINT SETS: This is a fairly quiet area of the market. It should be noted that several bidders want the early (1936-42) sets at current levels.

COMMEMORATIVES: Some additional minor losses were recorded in the silver commem market last week. In contrast, gold commems remain strong with buyers interested in all issues. The 1916 and 1917 McKinley in MS-65 condition drew slightly higher bids again last week.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $375.20 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch. 2 column inches maximum.

Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

DOLLARS AND TYPE STILL STRONG

Proof Gold, Gem Franklins, and Proof Singles Now Very Active

The Market in Depth

ALLEN HARRIMAN

Once again this week the renewed interest in MS-65 type coins and silver dollars is quite evident. Silver dollars were, of course, the major bright spot in the generally bleak 1981 coin market. The lengthy buy lists for both MS-65 and Prooflike dollars indicate a continuing demand for these popular coins. The recent upsurge in the demand for choice type coins is another positive demand. The higher telctypc buy prices correspond with the healthy auction prices we've been seeing lately.

The new listings in the Monthly Summary have stirred up quite a bit of bidder interest. Franklin half dollars have been enjoying considerable attention of late, but this week there were even more buyers and even higher bids for MS-65 and MS-65 "full bell lines" examples. The new proof gold listings have also "inspired" several bidders to "go public" with their buy prices. And several want lists for 1936 to 1964 proof singles were monitored last week.

Subscribers should be aware that there is currently a tremendous shake-up in the financial markets. An increase or decrease in interest rates should have a significant impact on the bullion markets. After trading in a relatively narrow range for the past few months it looks like gold and silver could become quite volatile. So, be sure to check around before making any commitments.

We've had several requests to rerun the bids for Bust half dollar varieties (grades were mistakenly omitted from the price columns of the January 22 issue). So here are the bids for better dates and varieties including new bids for the earlier Draped Bust issues:

This Week's Market

CENTS: Quite a few bidders are still in the market for both BU rolls and Gem singles in the Lincoln series. Several dealers also seemed interested in 1936 thru 1942 proof singles.

NICKELS: Bidders are still interested in purchasing BU war nickel rolls. The 1938-D Buffalo roll edged up slightly to $775 bid. Circulated early (1794-1805) half dimes were lower in all grades. This is reflective of the overall weakness of the early (pre 1807) type coin market as shown by recent weak auction results.

DIMES: For the first time in recent weeks there were numerous bidders looking for BU Mercury dime rolls. So far, bid have been in the "bid" to slightly under range. Roosevelt rolls were relatively quiet this week.

QUARTERS: Once again this week Washington quarter roll action was almost non-existent. Arrows and Rays Seated quarter were bid slightly higher in MS-65 condition and the truly rare 1796 issue was lower in all circulated grades

HALVES: A few Franklin rolls drifted lower this week, but numerous bids for Gem singles (especially those with full bell lines) were monitored. Most of the 1934 to 1939 Walkers suffered losses (see page two).

DOLLARS: Another round of impressive plus signs this week. There was a lot of silver dollar movement, including a few losers too, so check out page six carefully. Several dealers are anxious to buy the more common BU dollars rolls and bids moved up accordingly. Demand for Ike dollars remains very strong at current levels.

PROOF SETS and MINT SETS: On the surface this market looks quiet. Actually there were quite a few transactions and there are quantity sellers and buyers at current levels.

COMMEMORATIVES: Another lackluster week for the silver market. Prices for several issues drifted lower and there seems to be very little buyer interest. In sharp contrast, several bidders want the gold issues in all grades.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $381.50 per ounce

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

"FULL BELL LINES" FRANKLINS ENJOY STRONG DEMAND

Matte Proof Gold And 1936-55 Proof Singles Also Appear On "Want Lists"

The Market in Depth

ALLEN HARRIMAN

Strong buyer interest has become evident during the past two weeks for several of the areas which were added to the January MONTHLY SUMMARY coverage of the market. Taken in order, bids for the matte proof gold coins has already been raised for all issues in virtually all grades. The new bid levels are:

	MS-60	MS-63	MS-65
$2½ Indian	$ 2,000 *	$ 4,000 *	$ 7,000
$5 Indian	3,250	5,500	8,500
$10 Indian	3,750	7,000	12,000
$20 St. Gaudens	8,500	15,000	22,500

(* dentoes unchanged)

Thus far, the earlier proof gold issues remain unchanged---with most of the attention being focused upon the later matte proofs. These coins, of course, are currently selling for a fraction of their recent high levels---and they are now considered to be "good buys" by at least some dealers.

Bidding for the Franklin singles in both gem MS-65 and gem MS-65 "full bell lines" condition has also increased noticeably. In this area, too, potential buyers are already willing to pay over bid for all strictly graded singles in both categories---with at least one dealer in the mood to pay ask for all gem "full bell lines" specimens!

Among the "MS-65 proof singles" activity has also been on the upswing. But, with scattered exceptions (the 1950-55 Lincolns, for example), most of the bidding noted so far has been around the levels reported in the new January MONTHLY SUMMARY chart. However, it appears that these current attempts to buy accurately graded proof singles are meeting with limited success at best. A large percentage of the 1936-42 specimens, in particular, exhibit problems of one sort or another.

Readers will note that bid levels for the later BU and proof roll sets---Lincolns thru SBA dollars---have all been raised this week. This is due to the fact that bidders are now beginning to include the 1979-S "type two" proof rolls in the appropriate roll sets. By the way, this week's substantial gain in the bid level for the 1979-S "type two" proof set can be attributed solely to demand for the SBA dollar---bid/ask now $66-$72 (with sales noted as high as $72). Thus the major gain for the Anthony dollar roll set. See page five.

PLEASE NOTE that last week chart covering the Draped Bust and Bust half dollars should have been divided into two sections. The 1801-1806 issues carry the correct grade heading. However, the grade headings for the 1807-1827 issues should read: Fine, VF, XF and AU. We suggest that those readers who are interested in this area of the market make the appropriate notation in their copy of last week's issue in order to avoid future confusion. We will continue to up-date bid levels in these series as they occur.

This Week's Market

CENTS: There are now several dealers who are in the market for gem MS-65 proof Lincolns ---particularly the 1950-55 issues. These bidders are utilizing the new price chart which appeared in the January MONTHLY SUMMARY. At least one potential buyer, it should be added, are already to pay ask for strictly graded examples. There is, by the way, continued interest in a number of the earlier BU Lincoln rolls---with at least some bidders now offering to pay "bid" rather than the usual bargain-hunting.

NICKELS: Slightly lower bid/ask prices have been noted for the proof three-cent nickel piece in all three grades---see page four. In rolls, the 1934-38 Buffalo issues are steady at current levels. It should be added that choice rolls now seem relatively few and far between. Four more gains have been recorded for the wartime Jeffersons: 1942-P (II) - $440, 1944-S - $250, 1945-P - $205 and 1945-D - $185.

DIMES: A few of the pre-1941 Mercuries are a bit lower this week: 1934-D, 1935-D and 1936-D singles---along with the very tough 1939-S roll. The 1941-45 "short set" issues remain unchanged in light trading. Strictly choice rolls, however, continue to elude those who are interested. Some scattered bidding continues to be evident across the Roosevelt series; most is at current levels---but two advances have been registered this week: 1947-S - $175; 1948-P - $185.

QUARTERS: The page two Washington singles chart has reflected further adjustments among the earlier dates. At least one dealer is offering a relatively lengthy list of the 1932-40 issues in grades MS-60 thru MS-65. Also affected have been the scarce 1934-37 P-mint rolls.

In "type", the "full head" Standing Liberty quarter (type two) is slightly lower in all three uncirculated grades---see page four.

HALVES: There are suddenly at least two major sellers of the 1934-39 Walking Liberties. No indication of the quantities available is being given---but, again this week, lowered ask prices have been noted for several dates (see page two). In contrast, one strong buyer is now offering to pay $98 for each of the 1941-45 P-mint singles (up $5)---and to pay $15 over the January MONTHLY SUMMARY bid levels for all of the other "short set" issues. All in strict MS-65 condition, of coursc.

DOLLARS: Numerous additional changes---mostly on the plus side---have been recorded for the BU dollar rolls this week. Several buyers are in the market for quantities of a long list of dates, but they do request "nice" rolls---not the "scruffy" put-together rolls frequently encountered. The MS-65 singles remain very strong and, as usual, one major bidder continues to offer a little over bid for a majority of dates in both series. On the other-hand, further downward adjustments are scattered through the MS-60 and MS-63 columns.

PROOF SETS and MINT SETS: The big news in this area is the very strong upswing in demand---and prices---for the often volatile 1979-S "type two" proof set. Bid has advanced to $92 (up $21)---and some anxious bidders will pay as much as $100 to fill specific orders! Other adjustments in these areas are of a minor nature; trading is moderate.

COMMEMORATIVES: The silver commems remain in a seemingly "soft" position. However, those dealers and investors who are looking for very strictly graded gem MS-65 examples often report that the majority of pieces currently listed for sale at "bargain prices" fall just a bit short. It should also be added that, at recent major auctions, the true gems almost invariably bring well over current bid/ask ranges!

U.S. GOLD. (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $379.60 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

LOWER PRICE LEVELS NOTED FOR SILVER COMMEMS

1979-S "Type Two" Proof Set Moves Ahead Substantially

The Market in Depth

ALLEN HARRIMAN

A number of higher bids for matte proof gold in MS-60 thru MS-65 were reported in last week's issue. Now, several advances for the earlier brilliant proof gold coins have been noted. These gains, of course, will appear in next week's chart in the February MONTHLY SUMMARY. However, the following is an "advance preview" of these latest increases:

	MS-60	MS-63	MS-65
$2½ Liberty	$ 1,500*	$ 3,500*	$ 6,500
$3 Indian	3,000*	6,000	11,000
$5 Liberty	2,000*	4,750	8,000
$10 Liberty	2,500*	5,750*	10,000

(* denotes unchanged)

The complete Susan B. Anthony BU and proof roll set has taken another gaint step forward with this weeks inclusion of the 1981-PDS rolls. All three of these rolls, of course, must be assembled from "broken up" 1981 mint sets---the only source for these coins. No examples are being minted for circulation at any of the three minting facilities. Bid/ask for each has been entered at $75/$85 this week. Thus far, actual trading has been very light---but keeping a close watch on this area might be a good idea! Such "mint set only" issues (such as the 1970-D halves and the 1973-P & D dollars) have always proven to be volatile soon after release.

Rather lengthy teletype selling lists covering a majority of the silver commems have begun to appear. Specimens in all three uncirculated grades---MS-60, MS-63 and MS-65---are included. At quick glance at page two will also show that the ask prices attached to most of the pieces now being offered have been lowered from previous levels. So far, it must be added, response to this new rash of selling messages has been light at best. This lack of activity is hardly surprising, though---in view of the fact that silver commems are currently more or less in the "out-of-favor" phase of the fairly predictable price cycle which has been witnessed several times in the past. The next few weeks may well be interesting ones for this area of the market. It should also be remembered that it is often during these periods of selling that many "almost there" coins appear with "full ticket" descriptions attached. When particular commemorative issues begin to look attractive, keep in mind that quality remains all important!

Time was when the value of virtually any Walking Liberty "short set" single was basically determined by dividing the roll price by twenty. The only exception to this rule used to be the usually weak strike S-mint issues---with an emphasis on 1941-S, 1942-S and 1944-S. However, during the past couple of years (and especially when these rolls reached their record high prices during the 1979/80 "boom") many of the extant original BU rolls were "cherry picked"---much the same as has been happening to BU dollar rolls for a much longer time. There are, of course, still many original BU Walking Liberty rolls available---but the chances of getting a picked-over roll increases daily. And now, the natural result of this phenomenon is a widening gap between the prorated BU roll price and the value of a gem MS-65 single---regardless of the date. Thus, too, it is quite possible to see the bid/ask level of a particular roll or rolls to go down at the same time that the bid/ask for MS-65 specimens of the same date(s) goes up! In fact, this has occurred this week. Lower prices have been recorded for the 1941-45 P-mints along with the 1942-D & S, 1943-D & S, 1946-S and 1947-P & D rolls. And at the same time, as was mentioned last week, at least one major quantity buyer is offering to pay over the January MONTHLY SUMMARY bid levels for all of the 1941-47 singles in strictly gem MS-65 condition.

This Week's Market

CENTS: A bit of profit-taking is in evidence for a number of the 1954-79 BU Lincolns; bag quantities of many of the later dates are now available. Quite a few of the earlier rolls, however, remain on current "want lists"---with "bid" being offered for strictly choice original rolls.

In "type", another advance (to $1550) has been recorded for the very elusive one-year-of-type 1859 Indian cent in gem MS-65 condition. The 1860-64 copper-nickel type, in contrast, is now in a lower $725-$800 range.

NICKELS: Interest in several of the wartime Jefferson rolls is still noted---but potential buyers are sticking with present bid levels. (The 1943-D roll, by the way, has edged a bit lower---to $150 bid.)

A few adjustments have been made to the page four chart for Shield, Liberty and Buffalo nickels in the various uncirculated grades. A number of these more plentiful type issues are now appearing for sale across the teletype circuits.

DIMES: The Mercury dime series has been the recipient of a major rash of minus signs this week---particularly the pre-1941 rolls and singles. At this point, there are simply more sellers than buyers---and it is apparent that those who might be interested in this series have assumed a "wait and see" attitude. Nor have the Roosevelts been spared from this weeks lowering of prices---check page three.

QUARTERS: Selling lists also continue to appear for the early Washington quarters. Minus signs have been registered this week for all of the 1934-37 P-mint rolls---along with numerous pre-1941 mintmarked issues in grades unc MS-60 thru gem MS-65. These past two weeks have witnessed the first real "sell off" among these dates in a long while---especially including such scarce issues as 1934-D, 1935-D, 1936-D and 1937-S. It will be interesting to see at what point these lowered prices will begin to attract those who know the actual scarcity of many of these dates in true gem condition.

HALVES: Four of the earlier Walking Liberty singles continue to drift lower: 1934-D & S, 1935-D and 1937-D. Two of last week's losers, however, have already rebounded: 1938-P and 1939-P. Quite a number of the 1941-47 "short set" rolls are also lower---but this hasn't affected the value of strictly MS-65 gem singles (see comments in "The Market in Depth"). With the exception of the 1953-PDS rolls, the Franklin series is unchanged in light trading. However, gem singles---with and without "full bell lines"---are still enjoying strong demand. The latest bid prices will appear in next week's February MONTHLY SUMMARY.

DOLLARS: Several small gains are again scattered across the MS-65 columns of both the Morgan and Peace dollar series. Top quality dollars continue to exhibit amazing strength---especially in view of the current market climate and economy in general. The MS-60 and MS-63's, by the way, continue to edge in the opposite direction---with little attention being paid to anything less than gem quality.

PROOF SETS and MINT SETS: Again the "big news" in this area is the continuing upswing of the 1979-S "type two" proof set. Bid/ask this week is pegged at $105/$115---and quantities remain difficult to locate. The "type two" SBA dollar coin, by the way, has advanced to $75 bid! The 1981 mint set, of course, is also in demand (now $14.50-$15.50) due to the inclusion of the "mint set only" 1981-PDS Anthony dollars.

COMMEMORATIVES: Strictly MS-65 gem gold commems remain very elusive---although a number of specimens carrying "optimistic" grade descriptions are floating around the marketplace. The MS-60 and MS-63's---as in other areas---are not in favor at the moment. See comments in "The Market in Depth" regarding the silver commems.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $375.70 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

"MIXED REVIEWS" FOLLOW MID-YEAR A.N.A. CONVENTION

Gem MS-65 Walking Liberty And Franklin Halves Remain In Demand

The Market in Depth

ALLEN HARRIMAN

The just concluded A.N.A. Mid-Year Convention has received "mixed reviews". Reports from attending dealers have ranged from "good" (very few "greats") to "leaving much to be desired". Varying reactions to any show, of course, are the norm. Even during the peak market of a couple of years ago, it was possible to find an occasional dealer who was having a "bad" show. Thus, the evaluation of each convention is relative. In the case of the Mid-Year, some dealers felt an increase in interest---and actual trading---while others did not. Obviously, the material which each dealer has for sale pretty much determines the outcome---even at the most sluggish times. Those dealers who exhibited "fresh" material in Colorado Springs would most likely have a better show than those whose bourse displays were more or less the same as they had been in Orlando and Long Beach just weeks before. Probably the best description of the Mid-Year was expressed by those dealers who were encouraged by the number of other dealers who were "in the mood to look at coins".

Not surprisingly, teletype activity diminishes somewhat while so many members are away from their stations. In actuality, very little gem material is currently offered for sale across the teletype circuits---this past week being no exception. And, as has been the trend for quite a while now, anything less than gem MS-65 receives very limited attention. Perhaps the main exception to this trend is the scattered interest noted for "nice defect-free" circulated early type coins. Bid/ask levels in this area, too, have adjusted downward over the past months---and the new levels are beginning to look attractive to at least some far-thinking buyers. And, of course, today's buyers are in an excellent position to be "picky" as well as to "negotiate" price.

A few more words about early circ material: the term "eye appeal" is usually applied to uncirculated coins---but it is not exclusively reserved for the BU category. A Flowing Hair dollar in VF condition also can---or may not---have "eye appeal". Evenly worn specimens with the natural color which comes from circulation and age, together with blemish-free surfaces and smooth rims are the pieces which attract buyers. Another example which is "technically" VF---but which has been harshly cleaned or which shows obvious circulation marks---will probably remain unsold until the price is adjusted accordingly. To put it another way, there are "VF's" and then there are VF's! This "eye appeal" theory applies, of course, from all grades from Good thru AU.

And while on the subject of circulated coins, the following is an extension to recent buying lists covering circulated earlier half dollar overdates and varieties. The previously published list ended with the 1827/6---these later issues are also wanted at the bid levels which follow:

	Fine	VF	XF	AU
1828 sm. letters	$ 90	$ 160	$ 250	$ 400
1829/7	33	55	110	210
1832 lg. letters	40	70	125	250
1836/ - 50/00	60	135	215	340
1836 R.E.	450	800	1200	1700
1839-O	140	235	400	600

This Week's Market

CENTS: A few of the earlier Lincoln rolls (1936-D, 1938-D, 1939-S, 1941-S, 1942-D & 1943-D) have been offered in moderate quantities at slightly lower levels. On the other-hand, there are bidders for a number of other pre-1944 issue who seen unable to find the "right" rolls at current prices. It should be stressed that "spotty", fingerprinted or otherwise inferior rolls do not command prices in the bid/ask range; such lower quality material usually sells at substantial discounts.

NICKELS: Some of the "short set" (1934-38) Buffalo rolls are now available at lower prices---at shows and through "private treaty" sales. Included among these are: 1935-P, 1935-S and 1936-PDS. Care should be exercised when buying---choice, brilliant, original rolls, of course, have by far the best potential for the future. Although some of the individual rolls which make up the Jefferson wartime group (1942-45) are occasionally offered for sale, locating already assembled roll sets remains difficult at bid of $2500.

Three of the more plentiful "type" coins in this area are again pegged at in lower ranges: three-cents (nickel) - $700/$775, Shield nickels (no rays) - $950/1050 and Liberty nickels (with cents) - $600/$675. The tougher types remain tough---that is, strictly in "no question" MS-65 condition.

DIMES: Bid for "choice original" BU rolls of the common P-mint Mercuries has edged back up to $490 bid. (The usually poor strike 1945-P roll is not included on current buying lists.) Prices are steady---at least this week---for the remaining dates from 1934 thru 1945. Two Roosevelt rolls are wanted at higher prices this week: 1946-P at $60 (watch out for "super sliders" in these rolls) and the low mintage 1955-P (needed in quantity at $83).

Several prices adjustments---all on the minus side---will be found among the type half-dimes and dimes (as well as other series); see page four.

QUARTERS: The lower ask prices for early Washingtons recorded during the past couple of weeks have resulted in only scattered transactions. As in any other area of the market, a lowering trend usually results in a "wait and see" attitude---waiting to see if ask prices will dip even further before commitments are made. A few scattered Washington rolls (most notably 1939-P and 1940-P & S) have also joined the movement toward more reasonably priced levels.

HALVES: The 1934-40 Walking Liberty halves have taken a "breather" this week after recent losses. The 1941-47 rolls, too, remain unchanged although frequent bidding continues to be monitored for conservatively graded MS-65 singles of all dates in this group. (See the latest bid levels in the enclosed February issue of the MONTHLY SUMMARY). And little interest is being shown for Franklin rolls (with a few minus signs among the later dates) even though top quality singles are enjoying an upward swing. Gem single Franklin halves, by the way, are fewer and further between than many people think---and "full bell lines" pieces in MS-65/better condition are even more elusive! Bidding for these ultimate quality specimens continues.

DOLLARS: The presently out-of-favor MS-60 and MS-63 Morgan and Peace dollars continue to exhibit minus signs here and there. Offerings of anything less than gem quality receive very little buyer attention. On the otherhand, at least one major teletype buyer continues to run regular buying lists for a majority of issues in both series---at price levels in line with current bid or a bit higher. Only "top quality" coins need apply!

Several small advances will be found scattered across the BU dollar roll chart (page six) "Put together" or otherwise lower quality rolls definitely do not satisfy today's bidders.

The Susan B. Anthony dollar BU and proof set has moved up to $2600 bid---reflecting demand for the 1979-S "type two" and "mint set only" 1981-PDS rolls. See page six for the new higher bids for these four sought after issues.

PROOF SETS and MINT SETS: Other than minor adjustments, the only real news among the proof sets again centers around the "revived" 1979-S "type two" proof set---bid/ask this week is a volatile $115/$125. In addition, the 1981 mint set has moved ahead strongly at $17 bid---with quantities wanted by several anxious bidders.

COMMEMORATIVES: The downward side of the price cycle still dominates the silver issues. Numerous issues are available as "discount levels"---especially if the buyer is willing to purchase "lots". To balance the report, it must be added that a few of the "commem specialists" state that they are unable to buy specimens which satisfy their criteria for truly gem pieces at today's price levels.

The gold commems in gem MS-65 condition, however, are not easy to find. Three issues (the two McKinley's and the 1926 $2½ Sesqui) have advanced this week.

U.S. GOLD: (Prices ara for the most common date of each type.) Bullion related gold coins in this issue ara figured on a basis of gold at $363.80 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

"FULL BELL LINES" FRANKLINS REGISTER FURTHER GAINS

Strictly Gem MS-65 Silver Dollars Also Record Several New Advances

The Market in Depth

ALLEN HARRIMAN

Strictly graded MS-65 "full bell lines" Franklin halves are enjoying more and more buyer attention. Many dealers have been searching bourse tables at recent shows in the quest for these top quality specimens---and several teletype bidders are continually in the market for quantities of all dates in the series. Bid levels have already exceeded those registered in the February issue of the MONTHLY SUMMARY. Thus, in order to keep subscribers up-to-date, the following are the latest bids for gem "full bell lines" examples:

1948-P	$ 40	1952-S	$250
1948-D	40	1953-P	75
1949-P	180	1953-D	50
1949-D	175	1953-S	260
1949-S	500	1954-P	25
1950-P	95	1954-D	40
1950-D	63	1954-S	130
1951-P	40	1955-P	30
1951-D	165	1956-P	30
1951-S	250	1957-P	30
1952-P	40	1957-D	25
1952-D	44	1958 thru 1963	25

It should also be added that one anxious bidder is offering to pay $35 (!) for quantities of any date---as long as they meet his exacting requirements for the gem category. Gems are characterized by very sharp strikes, clean surfaces and original brilliance---along, of course, with totally "full bell lines". Needless to say, such specimens "do not grow on trees"!

And while on the subject of prices being offered for exceptional coins, it is also interesting to note that a bid of $300 is monitored for any date Morgan dollar in true MS-67/67 condition! However, finding even one or two coins now and then which fit into this category is quite a task! Not surprisingly, this regularly seen teletype bid has resulted in very few transactions.

Although the number of minus signs across this week's issue might not indicate it, there seems to be a "firming" trend in most areas of the market. This is basically illustrated by the smaller percentage of teletype buying messages which fall into the strictly "bargain hunting" category. More and more bidders seem to be willing to pay current market levels for much of the material they need. The next several weeks could certainly be "barometer" ones for the general market.

A final note: it is apparently official that no 1982 Kennedy halves will be minted for circulation. This, of course, will leave the 1982-S clad proof as the only '82 dated half available---since no mint sets are to be produced. Good news for those who will receive 1982-S proof sets; bad news for half dollar collectors!

This Week's Market

CENTS: At least one major (and frequent) bidder is attempting to locate quantities of virtually all Indians and the better pre-1934 Lincolns in strictly graded Good thru Fine condition. Bid prices are all within recent MONTHLY SUMMARY levels. In this area---as in all others---grading is crucial; coins with defects (nicks, scratches, dark) are not wanted at these prices. Even though a couple of BU Lincoln rolls (1935-D, 1943-D) are a bid lower this week, several dealers remain in the market for many of the pre-1944 rolls in "no problem" choice condition---again at current "bid".

The still very elusive gem MS-65 examples of the 1859 Indian are still advancing---bid this week is $1600.

NICKELS: The most easily located BU Buffalo nickel rolls have edged lower: 1937-P - $750/$815 and 1938-D - $700/$760. The remainder of the "short set" rolls are unchanged after last week's numerous minus signs. Activity among the Jeffersons is still centered around occasional short "want lists" designed to fill specific needs; otherwise, trading in this series is still very light.

DIMES: The 1940-43 S-mint Mercury rolls are registered in lower bid/ask ranges this week; bidders continue to concentrate on the common 1941-45 P-mints. And in line with the recent lowering of prices for most of the individual rolls, bid/ask levels for the BU Mercury roll sets have been adjusted---see page five. Changes are minimal among the lightly traded Roosevelts---with the exception of the late dates which have all been affected by lower bullion levels.

In the area of "type", a number of lower price levels will also be found among the dimes. Not participating, however, are the very tough (in strict gem MS-65 condition) "no stars" and 1873-74 "with arrows" versions

QUARTERS: The early Washingtons---rolls and singles---have suffered further losses this week. One major seller is offering many of the pre-1941 issues in MS-60, MS-63 and MS-65 condition at discounted prices; sales, so far, have been minimal. In addition, a number of rolls in the "short set" group have also been listed for sale at lower levels (the later dates, of course, as a result of falling silver bullion prices).

HALVES: Only two changes have been recorded for the pre-1941 Walking Liberties: the 1938-D is in a lower $1100/$1200 range and the 1940-P is higher at $150 bid---both in MS-65. And even though four of the "short set" rolls have been offered for sale at discount prices (1944-S, 1945-S, 1946-D, 1947-P), strong bidding for gem MS-65 singles continues---all at the new February MONTHLY SUMMARY levels. (It should be remembered that today's BU rolls often include few specimens which classify as strictly gem quality.)

DOLLARS: At least one more strong bidder has joined the search for gem MS-65 silver dollars---with a lengthy list of dates for which "over bid" is offered for the "right coins". Thus, a number of gains will again be found scattered across the MS-65 columns. And, once again, it has to be stressed that conservative grading is a MUST for coins to realize these prices. They must be sharply struck, have clean cheeks and original surfaces. To be repetitious, "close is not good enough"!

The mint-set-only 1981-PDS Anthony dollars are all three now pegged in a $105/$115 per twenty coin roll---or $5.25-$5.75 bid/ask per single. The 1979-S "type two" version has slipped just a bid this week---see page six.

PROOF SETS and MINT SETS: The 1979-S "type two" set has backed off a little---several transactions have been registered within this week's lower $107-$117 range. Changes among the others are issues are minor.

COMMEMORATIVES: Locating properly graded MS-65 gold commems is quite a problem; a large percentage of those pieces offered for sale turn out to be "optimistically" graded. There are buyers for strictly gem MS-65's---but they aren't having much success. A few more minus signs will be found scattered across the silver commem chart. Most of the current interest in this area seems to be centered upon the few and far between MS-65+ (MS-67) specimens---for which premiums will be paid by knowledgeable specialists.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $361.70 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

SHARPLY LOWER BULLION PRICES AFFECT NUMEROUS AREAS

Strong Demand Recorded For Complete Anthony Dollar Roll Sets

The Market in Depth

ALLEN HARRIMAN

The sudden---and quite substantial---drop in the price of silver and gold bullion has had its usual quick influence on the trading levels of bullion-related material. Directly affected, of course, are "junk" silver bags of all types, the various slightly better circulated rolls, circ silver dollars, the later BU rolls, etc. And a glance at the chart at the bottom of this page will give a indication of the nearly blanket lowering of prices among common date U.S. gold and bullion-related foreign gold coins. These are, of course, the immediate and direct changes caused by lower bullion prices. There simply hasn't been enough elapsed time for a number of other areas to react---later proof and mint sets, common circ type material, the somewhat better BU rolls, and so on. Should bullion rebound, these areas might reflect little or no change; if new lower bullion trading ranges are established, further minus signs in other areas wouldn't be surprising.

Readers will also note that the U.S. gold chart reflects a large number of lower prices for "choice" MS-63 and "gem" MS-65 gold type coins. Actually, these adjustments are more or less coincidental with this week's major drop in the price of gold bullion---rather than caused by the drop. Still, what further reaction might come along---if bullion levels continue to slide---is yet a matter of conjecture. Most dealers report a genuine scarcity of gem gold type coins at various recent shows---but "getting the price" when a specimen is for sale still often remains a problem.

There is no doubt that the next few days---and few weeks---will be ones during which to watch the market very closely!

The Susan B. Anthony BU and proof roll set is "hot"---or, at least, very warm! Bid for the thirteen issue roll set has advanced to $2850 this week---up another $250---mostly on the strength of the 1979-S "type two" issue. This roll is now bid at $2000---and quantities are wanted. So far, an insufficient number of these rolls has been available and strong buyer demand continues. Indications are that fewer "type two" dollars were minted than any of the other denominations---and finding proof sets which contain the dollar is becoming more and more difficult. Several dealers are reporting brisk retail sales of the complete Anthony dollar single sets---often with "back orders" piling up while the "type two" dollar is sought. It is nice to have another "bright spot" in the market to go along with the continued interest being expressed for gem MS-65 "full bell lines" Franklins!

This Week's Market

CENTS: The lower priced late S-mint proof Lincoln rolls have been edging higher during recent days---the minimum bid for any date (including "mixed date rolls") is now $33. Changes are minimal across the remainder of the series.

The one-year-of-type 1859 Indian cent is still bucking the trend with another higher bid ($1650) for strictly graded gem MS-65 specimens. This is truly a tough coin in top quality condition.

NICKELS: Several more minus signs will be noted among the Buffalo nickel "short set" rolls. Even though only scattered rolls are available, most potential buyers are either strictly "bargain hunting"---or they have assumed a "wait and see" attitude. As usual, the Jeffersons have little of importance to report.

"Type" half-dimes have registered an almost-the-board lowering of prices in MS-60, MS-63 and MS-65 condition. Not included, however, are the seldom seen Flowing Hair and Draped Bust issues. Take a thorough look at page four!

DIMES: As with the Buffalo rolls, just a few offerings of Mercury rolls tend to lower prices due to the lack of buyers on the current market scene. (Most of those issues which are "static" may be so simply because they haven't been listed for sale at all.) This week's extensive losses for the Roosevelts have been mostly registered for the bullion-related issues---not surprisingly, potential purchasers are waiting for the "flack to settle" before making commitments among these later date rolls.

QUARTERS: The Washington singles in the 1938-40 group have followed the downward trend set by the earlier dates last week---see page two. And, as is the case in the Roosevelt series, the bullion-related Washington rolls have fallen victim to sagging silver prices; the minus signs this week extend from 1953 thru 1964.

Among the "type" issues, most of the various Seated Liberty issues have recorded lower bid/ask levels in all three uncirculated grades. And, as always, it must be stressed that current buyers are virtually all very strict graders; placing a particular coin in the correct grade category is all important!

HALVES: One major bidder is now in the market for quantities of the 1934-39 Walking Liberty singles---in strictly gem MS-65 condition. So far, offering to pay current "bid" has met with only limited success. A few of the "short set" rolls (1942-S, 1943-S, 1946-PDS) have edged lower---but strong bidding for gem singles also continues for the 1941-47 issues.

Nor have the later Franklin rolls been spared from the effects of the slump in silver bullion prices; all of the 1957-63 rolls are now recorded in lower bid/ask ranges. It must be pointed out that these lower roll prices have not affected demand (or price levels) for gem "full bell lines" singles; these are still "hot"!

DOLLARS: On the positive side, a number of strictly gem MS-65 prooflike Morgans have moved into higher bid ranges. Locating these PL's in top quality condition is far from an easy task! Minus signs dominate the MS-60 and MS-63 columns of both series. These lower levels, of course, are in line with today's concentration on "the finest". Even "bargain" offerings among the lower quality fail to attract much buyer attention.

The Anthony dollars are active---see comments in "The Market in Depth"!

PROOF SETS and MINT SETS: The 1979-S "type two" proof set has rebounded after last week's minor set-back---bid/ask has moved back to $115/$125. Again, this increase can be attributed to the current very strong demand for the SBA dollar (prices have edged lower for the "type two" nickel, dime and quarter rolls). The 1981 mint set is in a slightly lower $17-$18.25 range.

COMMEMORATIVES: Prices have settled down for the silver commems after several weeks of skidding levels. It should be noted that the percentage of strictly gem MS-65's among the specimens being offered for sale isn't very high. As mentioned previously, commem "specialists" are stating that the floating supply of true gems is very, very small. The same holds true for the eleven gold commems---finding just the "right" specimen of any issue is not at all easy!

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $328.50 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

• Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

DOLLAR ROLLS, MS-60 & MS-63 SINGLES MOVE LOWER

Anthony Dollar Roll Sets Still In Demand— Now At $3000!

The Market in Depth

ALLEN HARRIMAN

It should come as no surprise that the recent drop in the price of silver bullion has had its effect on the more plentiful BU silver dollar rolls. Following last week's lowering of bid/ask levels for the late BU dimes, quarters and halves, a majority of the dollar issues listed on the page six roll chart have registered minus signs this week. Actually, so far, the percentages by which prices have been lowered are quite small---indicating continued interest in dollar rolls. In addition, of course, most of the BU rolls seen these days have been "picked over" repeatedly; it is now unusual to find rolls which average much better than MS-60/60+---particularly the "P" and "O" mint issues. As a matter of fact, when buying (especially when buying "bargains") it is always a good idea to check for any "super sliders" which may have sneaked into today's rolls.

But the lowering of bid/ask levels for MS-60 and MS-63 singles has not been limited to the corresponding rolls. As anyone involved with silver dollars already knows, the present buyer interest centers upon top quality specimens---with very little interest being shown for less than gem MS-65 unless the price tag falls into the "real bargain" category. Thus a large number of dates which are rarely, if ever, traded by the roll have also witnessed lower price levels in the two lesser grades of uncirculated. This is particularly evident for the higher priced branch mint issues---and, by the way, has extended over into the circulated category for a few of the tougher dates (1889-CC; 1893-P, O & CC; 1894-P and 1895-O & S).

A bright note: A majority of the Morgans and virtually all of the Peace dollars (in gem MS-65 condition) remain on several regular "want lists"---often at a bit over bid. And, numerous MS-65 prooflikes have advanced this week---see page six!

The enclosed March issue of the MONTHLY SUMMARY reflects the numerous lower price levels which have accumulated for the various series during the past month. This is especially true for those series in which the "common" date type bid/ask level has slipped lower (examples: Shield nickels, Barber dimes and quarters). This lowering of prices for the most common date(s) in a series has had at least a commensurate effect upon many of the scarcer dates. Added to this, other areas have also moved lower---examples: Buffalo nickels and many of the "full bands" Mercury dimes.

On the more positive side, the 1934-40 Walking Liberty halves have firmed noticeably---with all "bargain offerings" disappearing (at least, all the properly graded ones)---and the 1941-47 issues in strict gem MS-65 condition reporting higher bid levels. Another group which will be found sporting an across-the-board run of plus signs is the Franklin half dollars---in MS-65 and, especially, in MS-65 "full bell lines" condition. It is suggested that readers closely examine this issue of the MONTHLY SUMMARY---there are many important price changes!

This Week's Market

CENTS: Mild bidder interest (at current levels) continues to be monitored for many of the pre-1943 BU Lincoln rolls---but only in "strictly choice" condition, of course. In addition, at least two bidders are now in the market for gem singles from 1934 thru 1940. Among the later issues, quantities of choice 1944-D and 1945-D rolls are wanted at higher levels---and the minimum bid for any S-mint proof roll is now $36.50.

NICKELS: Four additional minus signs will be found on the Buffalo nickel roll chart---the new levels are: 1935-P - $1600/$1750; 1936-P - $1200/$1300; 1937-D - $925/$1000 and 1937-S - $1000/$1085. Buyer interest for the 1934-38 "short set" rolls remains minimal. The Jeffersons are quiet and virtually unchanged.

In the area of "type", lower bid/ask levels have been recorded for both the "with rays" and "no rays" Shield nickels and the 1913-P "type one" Buffalo nickel---in all three uncirculated categories; see page four.

DIMES: Again a majority of the 1934-43 Mercuries---both singles and rolls---have reported lower prices. It must be remembered that the prices listed for singles in the page two chart are for MS-65---but not for "full bands" specimens. (These are listed in each issue of the MONTHLY SUMMARY.) By the way, it is probably a good idea to check the new lower bid/ask ranges for "full bands" Mercuries---particularly the many changes noted for the 1934-45 issues.

Bid has edged back up to $36 for any "original BU roll" of Roosevelt dimes; otherwise, this series is extremely quiet at the moment.

QUARTERS: The early Washingtons continue their slide to lower price levels. One major seller continues to offer practically all of the 1932-40 issues in MS-60, MS-63 and MS-65 condition; only occasional sales have resulted thus far. These early dates have been joined this week by the 1944-S, 1949-P and 1951-D rolls. Not surprisingly, such lowering of ask levels only results in potential buyers adopting a "wait and see" attitude. After all, why buy now if the same coins might be even less expensive next week?

HALVES: As readers will remember, minus signs recently plagued the 1934-40 Walking Liberties---much the same as the Washingtons are currently being affected. Now, however, relatively strong bidding is being noted for all of the pre-1941 singles in strict MS-65 condition. Bids have yet to advance---but attempts to locate the quantities wanted at current levels have met with only very limited success. Continued bidding also continues to be recorded for MS-65 "full bell lines" Franklins; the new bids will be found in the enclosed March issue of the MONTHLY SUMMARY.

In "type", the various Seated Liberty half dollar varieties have moved lower in all three uncirculated grades---following the examples recently set by the smaller denominations---see page four.

DOLLARS: Depressed silver bullion prices have taken their toll upon the BU dollar rolls---check page six. In addition, the out-of-favor MS-60 and MS-63 Morgans have suffered another rash of minus signs---along with those more expensive MS-65's which have been left off of current buying lists; see comments in "The Market in Depth".

The Anthony dollar series is still "flying high"! Bid for the thirteen issue BU and proof roll set is now $3000---with several sets needed. The action continues to center around the 1979-S "type two" roll---which is now bid at $2100.

PROOF SETS and MINT SETS: The 1957-64 proof sets have been mildly affected by the recent drop in the price of silver bullion; small quantities are currently available from a number of dealers. The 1979-S "type two" set remains on buying lists---now at a slightly higher $117-$127.

COMMEMORATIVES: The silver issues have registered only a few minor adjustments during the past week; trading remains very light. A considerable amount of interest, however, continues to be noted for the eleven gold issues---in all three uncirculated grades. There are the usual "bargain hunters" around---but there are also other bidders who are willing to pay at least current levels for the right specimens (i.e. strictly graded).

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $324.70 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

Vol. XX No. 12 | March 26, 1982 | Single copy price: $2.50

NUMEROUS PROOF TYPE COINS RECORD LOWER PRICES

1979-S "Type Two" Proof Dollar Bid At $110; Entire Set At Only $120!

The Market in Depth

ALLEN HARRIMAN

The 1979-S "type two" proof set currently finds itself in an unusual and interesting position! When one compares the present bid of $120 for the "complete" proof set (that is, a set with all six coins of the "type two" variety) and this week's new bid of $110 for the Anthony dollar alone, it does seem a bit odd. Taken at a glance, it would appear that the other five coins---cent thru half dollar---are only worth $10 as a group! This, of course, is in direct conflict to the total of the pro-rated roll prices for these five "other" coins; the total is $21.80. It would be difficult to pinpoint exactly why this discepancy has occurred. But, in speaking with dealers who are bidding for the Anthony dollars, it was stated by these particular buyers that they wanted the dollars only. Not wanting to "hassle" with the other denominations seemed to be the general theme. Thus, current prices for the set and the dollar offer those who wish to take advantage of the situation an opportunity to purchase complete sets and to sell the dollar---keeping the five other coins at minimum of expense. Should any one (or more) of these five pieces become "hot", the maximum potential would be realized. And chances are that the "type two" Kennedy half dollar will soon be included in coin albums---making it the second most desirable of the six coins. (The estimated mintage figures already place the half as the second scarcest of the group.) The Anthony dollar, as most readers probably already know, already has its own space in coin albums.

Two clarifications regarding the bid levels which appear in the CDN: First, the bids which appear in the various MS-65 columns are for strictly graded gem MS-65 coins---and this description includes strike. That is, for a coin to fall into the CDN price listings for MS-65, it must be sharply struck. The need for this clarification stems from the apparent fact that a percentage of coins graded by ANACS as MS-65/65 are not sharply struck. Teletype selling messages are frequently monitored which offer coins that are "ANACS MS-65/65, but weakly struck". Thus, to repeat, CDN prices for MS-65 are for specimens which fit all the strict qualifications for MS-65---including strike.

Second: Bid in each issue of the CDN is the highest bid registered. Individual dealers in the various areas of the country, obviously, are not obligated to pay bid. Each dealer, rather, offers prices based upon their current inventory, needs and possible outlets. A particular dealer may pay bid---a bit less---or a bit more. Bid, therefore, is an excellent guide with which to work---whether the reader is a dealer, investor or collector (or a combination). When a reader knows exactly the highest bid registered for a particular item, he is in the very best position to determine how much he is willing to buy and sell for.

This Week's Market

CENTS: A bit more activity is noted among the BU Lincoln rolls---particularly the earlier issues. Prices are mixed, however---and trading remains light. It should be added (as usual) that bidders want only choice rolls; anything less will not do! The more common of the 1968-to-date S-mint proof rolls have again edged slightly higher---minimum bid for any date (or mixed date) roll is now $37.50.

NICKELS: Bid/ask levels for the Buffalo nickel "short set" rolls now appears to have settled down---at least for the moment. Actually, not many choice rolls are being listed for sale (and relatively few have shown up at recent coin shows), but the few current potential buyers are seldom in the mood to purchase other than "bargain offerings". This week's changes for the more or less out-of-favor Jeffersons include---on the lower side: 1938-D - $260/$285, 1938-S - $300/$325 and 1943-D - $140/$152; showing a small gain is the 1944-D roll at $320/$350.

A number of lower price levels have been recorded for numerous proof type coins---in the MS-60 and MS-63 as well as the MS-65 categories. See page four.

DIMES: The Mercuries, too, seem to have "settled" somewhat after last week's major rash of minus signs. And there are bidders who are in the market for "choice, orginal" late date P-mint rolls---however, offers to "pay bid" frequently result in the receipt of inferior material. (Finding that a few "sliders" have slipped into Mercury rolls is not really unusual---especially the higher priced mintmarked issues.)

The latest changes for the Roosevelts has been limited to lower levels for a few of the "popular" dates in the 1950's---thesc are: 1953-S - $53/$58, 1954-S - $55/$60, 1955-P - $77/$83 and 1955-D - $55/$60. Trading remains light across thc entire series.

QUARTERS: The pre-1941 Washingtons have also taken a breather---and scattered sales have been reported at or near recently lower price levels. In addition, only a few adjustments have been noted for the 1941-64 "short set" issues.

Bid/ask levels are lower for the three versions of proof Seated Liberty quarter type coins: the "no motto" type - $2150/$2375, the "with motto" - $1900/$2100 and the 1873-74 "arrows" type - $4000/$4500. These prices, of course, are for strictly gem MS-65 examples.

HALVES: Frequent attempts to locate gem MS-65 specimens of any or all of the 1934-40 Walking Liberty singles "at current bid" continue to meet with very little success. Bidding for the 1941-47 issues also is regularly monitored---with hopeful dealers willing to pay March MONTHLY SUMMARY levels for all of the twenty dates involved---as long as thcy are full MS-65's.

Other than minor (downward) adjustments, the Franklin rolls are quiet. Bidding for top quality singles---including those elusive "full bell lines" pieces---remains strongly evident.

DOLLARS: A few more issucs have edged lower in both the MS-60 and MS-63 columns again this week. This continuing downward trend for these two categories reflects today's interest in gem quality only. Bid levels remain firm in the MS-65 column---with, it should be added, one major (and "fussy") buyer still offering to pay a over current levels for a long list of dates in both series!

Prices are evenly mixed among the BU dollar rolls---with four gains and four losses noted (sec page six). There are scattered buyers for "above average" rolls at slightly higher prices; as one dealer stated, he wants "MS-62" rolls.

PROOF SETS and MINT SETS: Only very minor changes have been recorded on these two charts this week. Of the most interest is the lower bid/ask range (now $16.25-$17.50) for the 1981 mint set---and the corresponding change to $100 bid each for rolls of 1981-PDS Anthony dollars.

COMMEMORATIVES: This may well be the slowest area of the entire market at the moment. Other than the occasional "bargain hunter", little mention is made of silver commems across the daily teletype read-outs. A little more interest is noted for the gold issues---but only at current bid levels.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $323.40 per ounce.

THE COIN DEALER NEWSLETTER

reports the actual retail market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch. 2 column inches maximum.
Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

TOP QUALITY HALF DOLLARS APPEAR ON SEVERAL "WANT LISTS"

1979-S "Type Two" Dollars Are Lower—But The Halves Are Up

The Market in Depth

ALLEN HARRIMAN

With the obvious exception of silver dollars, half dollars are enjoying a larger share of teletype buying messages than perhaps any other single area of the market. A group of cautiously higher plus signs has been registered this week for a number of Walking Liberties in the 1934-40 group---with all of the unaffected dates also appearing on current "want lists" at present bid levels. Included among this week's gainers are each of the '34-'39 P-mints as well as 1935-S and 1939-S. Quantities of strictly graded MS-65's are wanted. The 1941-47 singles in MS-65 condition, too, remain of regular buying lists---again with quantities needed at the higher bid levels reported in the March issue of the MONTHLY SUMMARY. Bidders report only a minimum of success in their attempts to buy (along with receiving the usual number of "optimistically" graded coins). It should also be added, by the way, that lower prices among the pre-1934 Walking Liberties has finally attracted the notice of at least one or two major buyers. Several issues in this group have also begun to show up on buying lists---again, all at current bid levels. The following dates are apparently of particular interest: 1916-P, 1916-D, 1917-P, 1920-P, 1920-S, 1929-D, 1929-S and 1933-S.

In the Franklin series, MS-65 "full bell lines" specimens continue to corner the lion's share of attention. Several dealers are vying with one another to locate quantities---sometimes "up to one hundred pieces"---of all thirty-five issues in the series. The majority of bidders will pay at least the bid levels recorded in the most recent MONTHLY SUMMARY--and a few others have already edged their offering prices a bit higher in order to be the "top buyer" in the field. By the way, as an example of prices which are occasionally offered for "wonder coins" in this area, one dealer recently stated that he would pay $2500 for a true MS-67 "full bell lines" 1953-S! Needless to say, it would take quite a coin to fit this description. Any date Franklin in MS-67 is very elusive due to the problems of strike---coupled with the prevalence of marks and abrasions. The S-mints, of course, suffer even more than the average from striking deficiencies---and there is some doubt as to whether all of the 1949-54 S-mints even exist in this ultimate condition!

Not to be out-done, the Kennedy series now has a candidate for the "most active" category. The 1979-S "type two" roll is suddenly on several buying lists---at a higher $260. As was mentioned last week, the half dollar is second in scarcity only to the Anthony dollar---and the price difference between the two coins doesn't seem to adequately reflect this fact. One explanation is that the half is not yet included in coin albums---and the dollar is. Chances are, however, that the next batch of half dollar albums produced could well include this variety.

Prices have again edged lower for a number of Morgan dollars in MS-60 and MS-63 condition. Specimens in this two lower uncirculated categories, of course, are far more easily located than are the strict gem MS-65's for which "want lists" are regularly monitored. By the way, some interesting attempts to buy "nice" (or even "choice") MS-60's have recently been encountered. However, by definition, a MS-60 is only one point away from being a circulated coin (AU-59)--and it would thus appear that these are contradictions in terms. Just what a "choice" MS-60 is would be anybody's guess---presumably it is actually MS-60+ or MS-63. The only characteristic that a true MS-60 coin must exhibit is the total absence of any evidence of circulation. Weakness of strike (even a major weakness) and/or a profusion of marks do not reduce the grade of a coin any further as long as it shows no actual wear.

This Week's Market

CENTS: The BU Lincoln rolls seem to have suddenly "sprung to life"---with several issues recording strong gains this week. Quantities are wanted---but it must be stressed that only choice rolls will be accepted at these new levels.

Interest also remains evident for virtually all of the Indian cents in defect-free Good, VG and Fine condition. Offers to pay the higher prices recorded in the March MONTHLY SUMMARY are meeting with only limited results.

NICKELS: There is very little to report in this quiet area. Few BU Buffalo nickel rolls are being listed for sale; but, on the otherhand, attempts to locate them are currently only very widely scattered (and usually of the bargain-hunting variety). An occasional bidder for a few Jefferson rolls is noted---and the buyer seldom has much problem finding the rolls needed---within present bid/ask ranges. One exception to this continues to be the elusive 1944-D.

DIMES: Again this week the Mercury dimes have remained extremely quiet. Other than the regularly monitored bids for "choice original" rolls of the late P-mint issues, the series is generally being overlooked. Alittle bidding among the earlier Roosevelt rolls is registered now and them---yet, even though a few dates are somewhat elusive, bid levels remain unchanged. Three later dates are slightly lower this week: 1955-P, 1956-P and 1957-D.

QUARTERS: Some obvious bargain-hunting is now being seen for the 1932-40 Washington singles---this coming soon after a major lowering of price levels for the entire group. Bids which are well below current market, by the way, frequently result in the receipt of "shakey" material. Again it should be emphasized that---in today's market, with its very tight grading standards---a MS-65 coin must be "all there"! Strike, marks, abrasions and quality of surface are all carefully considered when the piece is being categorized---and a problem in even one area usually downgrades the coin.

A few of the "short set" rolls have been listed for sale at lower levels this week: 1944-D, 1946-S, 1947-S and 1954-PDS.

HALVES: This is one of the most active areas of the market---see comments in "The Market in Depth".

DOLLARS: A second major dollar bidder has again joined the search for gem MS-65 dollars ---with lengthy buying lists in both series. It should be added that, in numerous instances, the two most frequent bidders will pay a little over current bid levels for the "right" specimens---and quantities are wanted. However, these "fussy" buyers know their silver dollars---and nothing less than strict gem quality will suffice. Actually, quite a large percentage of the dollars offered as "MS-65" do not fulfill their qualifications and thus are returned.

The 1979-S "type two" Anthony dollar has apparently "peaked"---at least for the moment. Bid is now pegged at a lower $100---and rolls are suddenly available. The complete 13-issue roll set is in a lower $2900-$3150 range.

PROOF SETS and MINT SETS: Changes in both of these groups are minimal---and trading continues to be relatively light. The 1979-S "type two" proof set is in a lower $115-$125 range this week. This set, by the way, remains in a "strange" position in relation to the current bid levels for the six coins included; bid for the half and dollar alone totals $113. Presumably this situation will straighten itself soon.

COMMEMORATIVES: Still a very quiet area---with a minimum of teletype activity noted. Gem MS-65 examples are fewer and further between, however than present price levels might indicate.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $323.30 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

GOLD BULLION REGISTERS STRONG REBOUND

BU Lincoln Rolls Record Numerous Gains; Gem Single Walkers In Demand

The Market in Depth

ALLEN HARRIMAN

Scattered areas of the market seem to be enjoying a certain amount of increased bidding---and bid levels have begun to edge forward here and there. Among the more notable of these areas are the BU Lincoln rolls. Last week's sudden upsurge of interest in a number of dates has been carried into a second week of "want lists"---accompanied by several substantial increases in bid levels. It is very interesting to note that---even in view of present market conditions---locating any quantity of the needed rolls in apparently not quite as easy as one might imagine. Only a few weeks back, sellers were having very little success in enticing buyers with "bargain" price tags; now many of these same issues are eluding bidders at prices well in excess of those being asked only a short while ago. For instance, in February and early March, a relatively large quantity of 1937-42 Denver mint rolls were available on the various teletype circuits day after day. No doubt these rolls (up to as many as thirty of a single date) have already been "picked off"---and more are now wanted.

Unfortunately, the remainder of the BU roll denominations aren't reflecting the same buyer interest at the moment. From nickels thru half dollars, only an occasional abbreviated buying list is monitored---and these are usually either designed to fill specific "one-time" needs or they fall into the now very familiar "bargain-hunting" category. And this holds true even for the truly elusive earlier dates in the 1930's.

However, though Walking Liberty rolls, are not attracting much attention, all gem singles from 1934 thru 1947 are wanted---and, again this week, several plus signs attest to the fact that such top quality singles aren't as forthcoming as their availability only a few weeks ago would indicate. Again, the recent "floating supply" was probably absorbed (with the less than gem peices having been rejected). This present demand for gems, by the way, is becoming quite similar to that evidenced for the Morgan and Peace dollars; the price spread between MS-63 and strict MS-65 is now widening noticeably in this area also. (And the same can be said for gem Franklin singles in relation to the corresponding roll prices.)

Although proof sets and mint sets can hardly be termed "active", there is a considerable amount of bidding in these areas also. When a dealer needs to fill specific orders for proof sets, locating a quantity at bid often takes several days of bidding attempts. On the otherhand, when a dealer has made a "fortunate purchase" of a group of mixed date sets, selling the group as a lot is not always an immediate procedure. Dealers tend to need certain dates---for client orders or, perhaps, for store stock. The mixed lots frequently offered obviously include issues which are not needed---and potential buyers would rather "pick and choose" than to receive a high percentage of dates not on their "want lists". By the way, at least one regular bidder is now in the market for quantities of all pre-1959 mint sets---and he is willing to pay a little over current bid levels for "choice, original toned sets in the mint holders". Not surprisingly, a substantial percentage of the mint sets now encountered have also been "cherry picked"---especially for the gem toned halves they frequently contain. Actually, finding these earlier mint sets in their full original condition---especailly in any quantity---is now far from a simple matter.

This Week's Market

CENTS: A number of BU Lincoln rolls in the 1936-56 group continue to gain ground---with three or four frequent bidders now in the market for quantities of those issues showing plus signs. As usual, less than choice original rolls are not wanted; spotted or otherwise inferior rolls seldom find a buyer.

Bidding also continues for defect-free Good thru Fine Indians---with virtually all of the 1859-86 dates appearing on current "want lists". And joining these buying lists are all of the less expensive half cents; again, bidders want relatively large quantities---as long as they exhibit clean surfaces and original color.

NICKELS: The 1944-D wartime Jefferson roll has now moved to $350 bid (up another $20); this one issue is still eluding potential buyers. With this lone exception, nickels remain lightly traded---with a bargain-hunter appearing occasionally on one or more of the teletype circuits. A few sales of the 1979-S "type two" proof rolls have been registered in a $64-$70 range.

As with the Indian cents, frequent buying lists are requesting quantities of strictly graded Good thru Fine Liberty and Buffalos---all at the higher bids recorded in the March issue of the MONTHLY SUMMARY.

DIMES: Edging price tags a bit lower for several of the BU Mercury rolls has more or less failed to intrigue possible buyers. Those issues thus affected this week include: 1940-PDS, 1941-S, 1942-S, 1943-D & S, 1944-D & S and 1945-D. However, mild interest in choice original rolls of the "common" P-mint rolls is still evident---at or near the present bid level of $475-$490.

Except for two adjustments---one in each direction---the Roosevelt series remains in the doldrums of recent weeks. The 1946-P roll is slightly higher at $60 bid and the often very tough 1949-P roll is now pegged in a lower $850-$925 bid/ask range.

QUARTERS: Scattered attempts to buy the pre-1941 single Washingtons in strictly "no question" gem MS-65 are being monitored across the teletype circuits. However, current bidders certainly aren't "desparate" or in a hurry---and the majority of bids noted are definitely designed to snare the occasional bargain which may be lurking in dealer stocks. As was pointed out last week, such "bargains" should be examined carefully!

Type coins---in this area as well as all others---remain steady at the new lower levels registered during the past several weeks. It must be added that specimens described as "MS-65" and which carry discounted price tags are generally of MS-63+/64 quality. Bid levels in the MS-65 column do not apply in such cases!

HALVES: Several additional small advances have been noted for Walking Liberty issues in the 1934-39 group. This week's winners: 1934-D - $610, 1935-D - $635, 1936-D - $335, 1936-S - $460, 1937-D - $535, 1937-S - $470 and 1939-D - $195. All of the other pre-1940 dates are also appearing on these new buying lists at the higher levels reported in last week's issue. Only scattered sales have resulted from this new spurt of bidding---strictly gem MS-65's seem surprisingly few and far between.

Although MS-65 along with MS-65 "full bell lines" Franklin singles continue to enjoy bidder attention, the rolls remain relatively stagnant. Many of these rolls, by the way, are being "cherry picked" for top quality specimens before they are listed for sale. Thus the overall quality of these rolls is deteriorating---much the same as has happened to the Morgan & Peace dollars and Walking Liberty halves.

The still advancing 1979-S "type two" roll has edged forward to a new largely unsuccessful bid of $270 per roll.

DOLLARS: Reporting actual bid levels for single silver dollars is becoming more and more difficult---that is, bid levels for MS-65's. Two or three frequent bidders continue to offer "over bid" for long lists of dates in both series---and, at the same time, there are numerous sellers of coins described as "strictly MS-65" at bid or even less. The problem, of course, is grading. The sellers feel that today's bidders are "too fussy"---and the buyers feel that the sellers are a bit "optimistic" in their grading. Suffice it to say that "top quality MS-65's" (sharply struck coins with clean cheeks, a true minimum of marks and eye-appealing surfaces) will bring a little over current bid levels in most instances. On the other hand, "technical MS-65's" without that "pizazz" will not!

In the Eisenhower series, the 1973-S "blue" Ike (40% silver BU) is higher---and wanted in quantity at $11. And in the Anthony series, the key 1979-S "type two" continues to reflect a bit of profit-taking after recent spectactular gains; bid is now $95 for singles and $1900 for rolls.

PROOF SETS and MINT SETS: Still a lightly traded area with only minor price adjustments noted. Serious buyers usually can locate the sets that they need within present bid/ask ranges. Bargain-hunters often find that they must take "mixed lots" if they want to buy just a bit below bid. The volatile 1979-S "type two" set is pegged in a $110-$120 range this week---with several transactions noted around $115.

COMMEMORATIVES: Just a few changes will be found among the silver commem issues this week. There are really only occasional sellers on the teletype circuits---but, in truth, these still outnumber the currently seldom encountered bidder. The gold issues are firm---and truly gem MS-65 examples are still very scarce (even though the usual number of overgraded pieces are around).

U.S. GOLD: (Prices ara for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $346.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions of offers to buy and sell but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE the prices in the Newsletter are from dealer-to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch; 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

the COIN DEALER newsletter inc
P.O. BOX 2308 HOLLYWOOD, CALIFORNIA 90028
Enclosed is my check/M.O. Please start sending me the Weekly NEWSLETTER as well as the MONTHLY SUMMARY by AIR MAIL/FIRST CLASS delivery for
☐ 3 Months $18.00 ☐ 1 Year $60.00 ☐ 2 Years $110.00

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MODERN ISSUES WARMING UP

Comments On Current Grading Standard Problems

The Market in Depth

ALLEN HARRIMAN

There is certainly little doubt that a considerable amount of confusion reigns today regarding just what constitutes a true MS-65 coin. This fact, comes as no surprise to anyone. There is no question that grading standards have tightened markedly in the past few years---and particularly during the past two years of market "adjustment". The "official" A.N.A. adoption of the MS-63 and MS-67 grades was definitely meant to clarify the grading dilemma---obviously a commendable goal. And these intermediate grades have certainly given graders "somewhere to go" with those coins which did not fit securely into either the MS-60 or MS-65 categories. Today, however, placing a particular specimen in one of four available uncirculated categories (including that much over-used MS-67) is not only tricky---but it can be very costly (or profitable). In the best of all possible worlds, of course, every coin would fit snugly into its proper category---and everyone would agree. But, alas, such is hardly the case.

To glance through the majority of auction catalogs---look over most bourse table displays—to check retail selling ads---or to read the daily teletype messages, one could certainly gain the impression that MS-65 coins are numerous---even plentiful. But this becomes an illusion as soon as today's strict grading standards are applied. Indeed, it is unfortunately true that the vast majority of these "MS-65's" are something less---whether it be a "very close" MS-64 or simply an over-graded MS-63 or even lesser quality piece. A percentage of this over-grading is merely an attempt to realize a substantial profit from the unwary---the old "we buy MS-63's and we sell MS-65's" approach. On the otherhand, another percentage of this over-grading is due to the non-application of current very tight grading standards. This can be either a "genuine error" or just "wishful thinking" on the part of the grader.

In the "good old days", the MS-65 coin was "choice"---and the term "gem" was reserved for "wonder coins" (which is today's seldom encountered MS-67). Things have changed! And one of the problems which still faces the industry is that there is still more or less two schools of thought regarding grading. The "old school" knows that standards have changed---but they can only agree partially (if at all) with these changes. The "new school" (but not necessarily newcomers to the business) accept these tightened and generally grade accordingly (particularly when buying).

If everyone accepted the fact that requirements for the various grades have changed, much of the present confusion would be cleared up. Or, at least, the confusion not caused by deliberate over-grading would effectively straighten out itself.

This positive approach would also go a long way toward explaining the apparent discrepancies between the prices being brought by the plentiful "MS-65's" at auction, etc. and the CDN bid levels for the actually quite elusive (to rare) true MS-65's. One last---and very important point: as has been mentioned previously, the ANACS grading service apparently does not feel that weakness of strike should be considered when placing the coin in a particular grade category. However, bid/ask levels in the CDN publications definitely do take strike into consideration---and, to fit into any of our MS-65 columns, a coin must be sharply struck (along with exhibiting all of the other characteristics necessary for this classification). We feel that this clarification is very important---and we will continue to stress this fact in future issues!

This Week's Market

CENTS: Things are really starting to warm up in the Lincoln cent market. Several bidders are in the market for most of the 1934 to 1951 rolls. In addition, numerous buyers have appeared for "Gem, full Red" examples of all 1934 to 1943 issues. Further evidence of growing demand for this series is the lengthy buy lists now appearing for Proof Lincolns. In short, the series is now receiving a lot of buyer action.

NICKELS: Buffalo and Jefferson rolls are relatively quiet. However, there are buyers for MS-65 1934 to 1938 "short set" Buffaloes. Proof Jeffersons are now receiving quite a lot of attention. Several of the war nickel rolls edged higher this week (see page three).

DIMES: Trading in Mercury dime rolls was virtually non-existent this week. However, there are several buyers for proof Mercuries. This is in keeping with the general upbeat trend for all 1936 to 1964 proof singles. Roosevelt rolls were quiet with buyers now "bargain hunting" at 5% to 10% off bid.

QUARTERS: Washington quarters remain one of the quietest areas of the coin market. It looks like the price drops for the pre-1941 issues have, at least temporarily, stopped as buyers have appeared at current levels. Later rolls are still soft---see page three for this week's minor drops.

HALVES: Half dollars, in general, remain one of the brightest areas of the market. Once again this week bidders are concentrating on top quality examples of the modern issues. All 1934 to 1947 Walking Liberties are wanted in "strict" MS-65 or better condition. A few of the inexpensive early dates (1916-P, 1929-D, 1929-S, etc.) have been added to the now lengthy dealer buy lists. Gem Franklin half dollars are even hotter than Walkers! Check out the "across-the-board" gains for MS-65 and MS-65 "full bell lines" Franklins in the new Monthly Summary. Also commanding a good share of buyer attention are all proof Franklins. One can only wonder when the roll buyers will join the party. The 1979-S type two proof has jumped to $320 bid this week with buyers noted at $340!!

DOLLARS: Dollars were really a "mixed bag" this week. The usual minor gains were recorded for several of the more common date MS-65 issues. On the otherhand, several of the more expensive coins dropped sharply, reflecting buyer resistance to "big-ticket" items during these troubled economic times. Dollar rolls also look a little weak (see page six).

PROOF SETS and MINT SETS: With all the attention now being focused on proof singles it only seemed natural that proof sets are now receiving quite a few bids. Strong interest is being expressed for all 1936 thru roughly 1956 issues. The 1936, 1937 and 1939 set were bid higher this week. One bidder has been unsuccessfully trying to buy "up to 500" 1956 sets for three weeks now. Mint sets aren't receiving that kind of action, but there are buyers for "originally toned" sets.

COMMEMORATIVES: Silver commemoratives slipped again this week with sellers still greatly outnumbering buyers. Conversely, the gold issues are wanted in all grades. It should be noted that substantial adjustment occurred in all grades in the price of both the round and octagonal $50 gold "slugs". This is a reflection of the lower prices recently realized at auction and on the bourse floor.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $350.70 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis Under the present system it is impossible to monitor all transactions nor offers to buy and sell but the broad information sources of the Newsletter make it a very accurate reflection of the market

INVESTORS NOTE the prices in the Newsletter are from dealer to dealer transactions As an investor you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker

ADVERTISING RATES
$25.00 per column inch 2 column inches maximum
Advertising space is limited ads will be placed in first possible edition

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

Collectors, investors, dealers! Cash in your coins now! Why wait forever, or lose money at auction, or outright sale? I'll sell those coins for you on consignment at your prices! All you have to do is let me have the coins for at least 30 days. And, give me the lowest possible price for each coin or collection. I know I can sell the coins! It's just a question of price and time! At the end of 30 days, I'll pay you in full for coins sold. Unsold coins will be returned to you at my expense. If you'd like to give it a try, but don't trust me, check me out through Coin World or Numismatic News, where I've been advertising for over 10 years!
Please ship, write, or call soon!

LINCOLNS, WALKERS AND FRANKLINS IN DEMAND

New Higher Bids Recorded For Modern Issues And Matte Proof Gold

The Market in Depth

ALLEN HARRIMAN

The thrust of buyer demand now seems centered on the more modern (1934 to date) issues. Numerous lengthy buy and want lists are being run on a daily basis. Both BU and Proof modern coinage is getting considerable buyer attention. This may be a sign of a strengthening of the overall market. The modern issues are very inexpensive relative to the older, rarer issues and it is usually the "big-ticket" items that suffer the most during markets.

The entire Lincoln cent series now receives virtually constant attention on the teletype circuit. Numerous bidders are anxious buyers of nearly all BU Lincoln rolls. Buyers also need earlier dates in MS-65 condition and key dates in all grades. Proof Lincolns are also in demand and bidders have already raised their buy prices above the new Monthly Summary levels. In addition to the usual areas of buyer interest a new market is forming for "superb Gem" 1934 to 1943 Lincolns. Several bidders have started a mini-bidding war in this area. The latest bids for "superb, unspotted, full red" singles are as follows:

	P	D	S		P	D	S
1934	$7	$ 42	$—	1939	$ 3	$6	$ 5
1935	5	9	25	1940	1	2	2
1936	5	6	6	1941	1	3	4
1937	2	2	5	1942	1	1	6
1938	4	5	6	1943	2	3	5

Note that some of these bids are well in excess of pro-rated roll bids.

All 1934 to 1947 Walking Liberty half dollars are wanted in MS-65 condition. All MS-65 and "full bell lines" Franklins and all proof Franklins are also in demand. Most of the 1936 through 1955 proof singles are wanted by several bidders. It should be noted that in many cases bids are above current Monthly Summary levels. Add the suddenly alive proof set market to the above and you have a very active market in the "modern" (1934 to date) issues.

Matte proof gold is bucking the "soft" trend of the more expensive numismatic items. Matte proof gold coins were minted between 1908 and 1915. All the mintages are extremely low, ranging from a high of 682 (1910 $2½) to a low of 50 (1914 $10 and 1915 $20). These extremely rare coins are now selling for less than one-third their 1980 highs:

	1980 High	Current Bid
$2½ Matte proof	$25,000 to $27,500	$ 7600 *
$5 Matte proof	$32,500 to $37,500	$ 9750 *
$10 Matte proof	$40,000 to $45,000	$13,000
$20 Matte proof	$75,000 to $85,000	$24,000

* new higher bids

Note that the 1980 high is the approximate wholesale ranges as these coins weren't listed in the Monthly Summary until January of this year. Matte proof now receives daily bids.

Special Note on Bullion Markets:

As this issue of the CDN goes to press, the bullion markets are becoming increasingly volatile. Until the Falkland Islands situation is resolved one way or the other, there is always the possibility of a dramatic overnight move in bullion prices. Be sure and check around before making commitments.

This Week's Market

CENTS: This is now one of the hottest areas of the market. The pre-1940 BU rolls are in great demand and higher bids include:

1936D - Up again this week, now bid $160
1936S - Now surprisingly tough at $155 bid
1937D & S - Both issues post gains again this week
1938D & S - Both bid at a higher $125
1939D - A longtime, low mintage favorite-now bid $210
Later dates are also receiving a good bit of play (see page three).

NICKELS: A few bidders have started looking for MS-65 Buffaloes. Proof Buffaloes are also receiving bids. Several Jefferson rolls have edged higher (see page three).

DIMES: The Mercury market remains very quiet. The 1945-P roll edged lower to $450 bid as did the 1945-S roll (now bid $650). Roosevelt rolls are not quite as soft and there are several bidders at or near current levels. All 1936 to 1955 proof dimes are receiving bids.

QUARTERS: Several of the Washington rolls drifted lower this week (see page three). One buyer of pre-1940 Washingtons is now running regular buy tapes at slightly below current bid levels.

HALVES: Virtually all 1916 to date halves are wanted by numerous bidders!!! Daily buy tapes for all 1934 to 1947 are now being monitored. Gem Franklin halves receive constant attention and some of the bids are becoming quite interesting. For instance, one buyer is now offering $2500 for a superb "full bell lines" 1953-S while another specialist says he'll pay "anything you want" for the same coin. All 1936 to date proof halves are now wanted with several buyers competing daily for proof Franklins.

DOLLARS: The Morgan and Peace dollar market remains in it's current "strange" state with buyers and sellers having increasing difficulty getting together. Several MS-65 issues drifted lower while quite a few other issues remain strong (see page six for specific changes). Dollar dealers do seem to be in agreement about Prooflike dollars as most complain that the supply of Gem prooflikes is virtually non-existent. Bidding for Ike dollars is definitely increasing though for new, buyers seem content at current levels.

PROOF SETS and MINT SETS: All proof sets are now receiving daily bids. Several of the early issues were gainers for the week as were some of the later dates. The 1979-S Type Two set is now bid $115. The 1982-S is getting a lot of action at a higher $18 bid.

COMMEMORATIVES: A few minor losses were recorded in the silver commemorative charts this week. Action on the teletype and at the coin shows is reportedly very sluggish. The 1933-D Oregon and Iowa are bucking the trend with bidders now seeking these two issues in all grades.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $340.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, the subscribers make all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: The prices in the Newsletter are from dealer to dealer transactions. As an investor you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch. 2 column inches maximum.
Advertising space is limited, ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BU LINCOLN ROLLS, '34-'40 W.L. SINGLES RECORD GAINS

1979-S "Type Two" Proof Sets Up Sharply—Mostly On Strength Of Halves

The Market in Depth

ALLEN HARRIMAN

Continuing among the winners are a number of BU Lincoln rolls. The interest which became apparent a few weeks ago still remains quite evident---with several bidders in the market for specific dates (mostly pre-1946). Again it must be stressed that rolls which are anything less than "choice original" will not be accepted at these advancing price levels. Although strike is seldom a problem experienced by Lincoln rolls (there are a few exceptions: 1935-S for instance), there well may be more other problems which affect cent rolls than any other denomination. Foremost, of course, is spotting---followed by fingerprinting and toning of various degrees.

Several issues seem to be particularly elusive in quantity at the moment---1936-D, 1937-D & S, 1938-S, 1941-D, 1942-D, 1944-D and 1945-D. Readers will note that the bid/ask level for the already assembled 1934-58 BU roll set has now advanced to $6400/$7000. Finding even a single roll set which meets today's exacting standards is definitely a problem; the vast majority of those offered contain at least a few (usually quite a number) of inferior rolls. Also recording smaller gains, by the way, are the 1941-58 and the 1959-to-date BU roll sets.

The 1979-S "type two" proof set has rebounded very handsomely during the past couple of weeks. Last week's advance (to $115 bid) has been strongly topped by the current considerably higher move to $135! The major cause for this gain is the now very elusive Kennedy half dollar roll. This roll is wanted in quantity---and the one-week advance to $425 (up $105) has not pulled out enough rolls to satisfy current interest. One anxious bidder, by the way, will pay as much as $460! With the exception of the Lincoln cents, however, all of the other (denominations have also moved higher this week (check pages three and six). It should be mentioned that the 1979-S "type two" proof set falls into a unique category in that the pro-rated roll prices for the six individual coins does not necessarily relate in the usual way to the price of the proof set. In fact, this week the coin/set price relationship is almost "right on". However, since the six denominations were minted in varying quantities, this relationship will not always hold true. A few weeks ago, for instance, the single Anthony dollar was bid at a level which was only slightly less than the bid for the entire set.

Most subscribers who are interested in the area will have already noted that there was a typographical error in the "MS-65 Proof Singles" chart in the recently mailed April issue of the MONTHLY SUMMARY. One line of prices was omitted at 1942---resulting in the prices which followed being up a line. Though the majority of readers easily figured out the problem, we reprint below the entire chart---including some last minute gains which have been recorded since the chart was issued:

	CENTS			NICKELS			DIMES			QUARTERS			HALVES

This Week's Market

CENTS: Several BU Lincoln rolls are still on the march (see comments under "The Market in Depth"). Interest also remains high for nearly all of the circulated Indians in Good thru Fine condition---basically at levels recorded in the April MONTHLY SUMMARY.

NICKELS: Changes remain minimal---and trading remains very light---among both the Buffalo and Jefferson nickel series. Gains have been noted for the 1944-D & S and 1945-P wartime rolls. As with the Indians, buyer interest is evident as usual for the better date Buffalos in the lower circ grades; only defect-free and natural color specimens are needed.

DIMES: A number of Mercury rolls (mostly among the "short set" issues) have again edged downward. These lower prices are generally noted among the mintmarked issues; the common date P-mint rolls are still wanted at current levels (in strictly choice original condition, of course). The Roosevelt series is quiet---with lower bid/ask levels registered for the 1949-P, 1952-P, 1954-D & S and 1955-D rolls.

QUARTERS: This remains a very quiet segment of the market. Present interest in the Washingtons is mainly of the "bargain hunting" variety. Below market bidding often results in the receipt of inferior material.

HALVES: In strong contrast to the quarters, this is a very active area of the market. All of the 1934 thru 1940-P Walking Liberty singles have recorded gains this week---with quantities of each date wanted. So far, these higher bids have resulted in sales of only an occasional coin or two. And even though the Franklin rolls are quiet, frequent strong bidding continues to be monitored for MS-65 and MS-65 "full bell lines" Franklins---with offers to pay as much as April MONTHLY SUMMARY ask prices sometimes noted.

In the Kennedy series, the 1979-S "type two" roll is now "hot" (see "The Market in Depth")---and the 1970-D & S rolls have also moved ahead. The complete roll set has advanced to $2650 bid.

DOLLARS: Prices are very lightly mixed across the BU single charts---and the BU rolls are steady at current levels. (Rolls of relatively inferior quality are frequently offered at "bargain" prices.) It should be noted that one major bidder continues to offer "over bid" for the right MS-65 singles.

PROOF SETS and MINT SETS: Several plus signs will be scattered across both of the page six charts. Of particular interest are most of the 1936-42, the 1968-70 and the 1979-S "type two" proof sets---along with the 1970, 1980 and 1981 mint sets. The 1982-S proof set is now being traded. The bid/ask range is currently a volatile $20/$22.50. Bids for rolls of the cents and nickels have also been monitored---but no bid levels have yet been ascertained for the other denominations.

COMMEMORATIVES: After the last two weeks of adjustments, prices for the commems have remained static during the past several days. The majority of monitored bidding definitely falls into a strict "bargain hunting" category.

U.S. GDLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $352.00 per ounce.

THE COIN DEALER NEWSLETTER

Reports the national coin market on a weekly basis. Under the present system it is impossible to monitor all transactions. It offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

ADVERTISING RATES

$25.00 per column inch. 2 column inches maximum.

Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MARKET CLOSING PRICES BU SILVER DOLLARS

Some MS-60 coins are actually worse than our MS-63 prices below. NOTE: that means a "bid range" is reported for MS-65 Prooflike Singles, especially lower quality ones being quoted by some dealers.

New Title And Owner For Rome's Prices Realized

Krause Publications has acquired the title, Rome's Prices Realized. The catalog will retain its same size and format, but will appear under a new title of Auction Prices Realized, U.S. Coins.
The 1982 edition, featuring auction results from 1981, will be available early this summer. For complete ordering instructions write to Krause Publications, 700 E. State St., Iola, WI 54990.

1979-S "TYPE TWO" PROOF HALVES SOAR!

Kennedy And Anthony Roll Sets Also Enjoy Strong Demand

The Market in Depth

ALLEN HARRIMAN

The forty-nine issue roll set of Kennedy half dollars is now on the minds of several buyers---and at a new bid level this week of $3050. This BU and proof roll set includes the recently available 1982-S proof roll---quite possibly the only 1982 dated half which will be minted. (A recent statement by the Director of the Mint indicates that it has yet to be decided whether or not circulation strikes will be minted---wtih the decision to be based upon "demand".) It is, of course, very difficult to pinpoint an exact bid/ask level for any newly available roll---and the 1982-S Kennedy roll is no exception. Last minute checks before making commitments are always advisable in such instances. Bid has been pegged at $275 this week---but this could change quickly.

And an even more volatile issue in this 49-coin set has suddenly emerged. Bid for the 1979-S "type two" proof roll advanced from $320 to $425 last week---and, this week, the gain has been substantially more impressive---from $425 to $800 (with at least one bidder already offering to pay $850!). A "revised" estimate for the mintages of the six "type two" proof coins has placed the half dollar at virtually the same mintage as the SBA dollar---halves: 428,000; dollars: 425,000. The reaction to these figures is self evident! By the way, the "revised" estimates for the other denominations are---cents: 829,000; nickels: 668,000; dimes: 737,000 and quarters: 624,000. These figures appeared in a major numismatic publication last week; we are reprinting them for those readers who may have missed the articles.

It should also be noted that bid levels have advanced very strongly this week for all of the smaller denomination "type two" rolls except the Lincoln cents. Bid/ask for the nickel, dime and quarter rolls are all listed at $175/$200. However, it must be stressed that these rolls rolls are currently as volatile as the half dollars---and, again, last minute checks before buying or selling are highly recommended!

Nor has the Anthony dollar BU and proof roll set been ignored by current bidders. There are thirteen issues in the 1979-81 set---yet even in this short-lived series there are "varieties" (the two versions of the 1979-S proof) as well as three "mint set only" dates (1981-PDS). Bid for the already assembled roll set is $3000---with the scarcity of the key 1979-S "type two" roll again basically determining availability. (This roll is a bit lower this week; bid/ask is now $1900/$2075.)

Another bright spot in the market continues to be the BU Lincoln rolls. Plus signs are even more evident this week; they are quite liberally scattered across the chart---the gains ranging from numerous dates in the 1930's thru 1956. The number of actual sales recorded during the past few weeks of bidding is surprisingly low---particularly in view of the current market climate. Of course, one of the major deterrents to a greater number of transactions could well be that current bidders will only take top quality rolls. A large percentant of those available today do not qualify.

This Week's Market

CENTS: In addition to the demand for BU rolls discussed in "The Market in Depth", frequent bidding continues to be monitored for the lower grade circ Indian and Lincoln cents---along with the interest currently noted for lower and middle grade half-cents and large cents.

NICKELS: Prices have been lowered for four of the more expensive Buffalo nickel "short set" rolls---the new bid levels are: 1934-P - $3650; 1934-D - $6500; 1935-D - $4000 and 1935-S - $2500. The 1934-38 BU roll set is now pegged at $25,500 bid.

The BU roll set of wartime Jeffersons is now receiving bids of $2600---which is slightly over the total of the bids for the eleven individual rolls. Locating this roll set---even in today's market---isn't easy.

DIMES: Prices continue to edge lower for several of the Mercury rolls. Even though only a limited number of rolls are available across the teletype circuits (and at recent conventions), virtually all of the potential buyers are in a bargain-hunting mood. From time to time, by the way, dealers offer "mixed lots" of singles and partial rolls at discounts. The only problem with "lots" (in any series) is that grading variations often nullify the "bargain"!

In "type", the very elusive 1873-74 "with arrows" Seated Liberty dime has advanced to $4500 bid---and the not-so-tough Barber dime is now recorded in a lower $850-$950 range (both in MS-65 condition, of course).

QUARTERS: Some "below market" bidding is now being registered for the 1932-40 Washington singles in strictly gem MS-65 condition. Thus far, these bids have been unsuccessful. Other than those minus signs which have resulted from lower bullion prices, changes among the rolls are minimal---and trading remains light and sporadic.

HALVES: Regular bidding continues for strictly gem MS-65 examples of all of the 1934-47 Walking Liberty singles. Bids remain at last week's new higher levels---and, it should be added, only a limited number of coins has changed hands. In contrast to this demand for gem singles, several of the W.L. rolls have been offered at lower levels. The spread between the MS-65 singles price and the value of BU rolls continues to widen---much the same as the more advanced situation in the silver dollar series.

The biggest news, of course, revolves around the "warm to hot" Kennedy halves---see "The Market in Depth" as well as the page three price chart.

DOLLARS: One strong bidder continues to offer "over bid" for a long list of dates in both series---with the "right" coin often changing hands at these advanced levels. On the otherhand, there are numerous sellers (on the teletype circuits and at conventions) who are willing to sell their MS-65's at discount levels. These facts make reporting in this area a relatively difficult task at the moment.

PROOF SETS and MINT SETS: Naturally, the 1979-S "type two" set is higher this week---bid is now recorded at $147.50. A number of other changes are in effect across these charts---see page six!

COMMEMORATIVES: Scattered adjustments have been noted this week---mostly (but not exclusively) affecting the MS-60 and MS-63 columns. Trading remains light in this area---with bargain-hunters still dominating.

U.S. GOLD (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $345.30 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

KENNEDY ROLL SETS IN STRONG DEMAND

1979-S "Type Two" Rolls Remain In Volatile Position

The Market in Depth

ALLEN HARRIMAN

Kennedy halves and Anthony dollars continue to corner a lion's share of telctypc activity. The action in both series, of course, is being led by the "key" 1979-S "type two" rolls---but certainly not exclusively. In the Kennedy group, especially, several other issues are now appearing on "want lists" at increased bid levels. These include both the 1968-S and 1969-S proof rolls at a considerably higher $70 bid (up $15), the mint-set-only 1970-D roll at $510 bid (up $35 from last week's $475) and the 1970-S proof roll, which is just beginning to move, at $180 bid (up $5). The 1979-S "type two" roll, by the way, has definitely scored the most impressive advance; bid has moved to an even $1000 this week (up $200) and a few sales have been noted at even higher levels! The entire forty-nine issue BU and proof roll set is now bid at $3300---with single sets listed this week in the $170-$185 range.

Though price changes in the Anthony dollar series haven't been as substantial as those among the Kennedy halves, interest in the BU and proof roll set---and single sets---has remained high. The roll set is bid this week is an even $3000 (up $200); single sets are strong in the $155-$167 range. Gains among the individual issues include an advance to $2000 (up $100) for the 1979-S "type two" roll---and slight increases (to $105 bid) for each of the three mint-set-only 1981-P D & S rolls.

It should also be mentioned that the lower denomination 1979-S "type two" rolls definitely remain in a volatile position. This week's bid/ask levels are more or less the same as they were last week (only the cents have advanced a bit)---but both buyers and sellers seem relatively uncertain about pricing. Again, last minute checks before making commitments are advised---for any of the "type two" rolls!

Readers will have noted that a few minus signs began to appear in the MS-65 columns of the silver dollar charts last week---and that a few more are scattered across these same charts this week. It must be pointed out that many of the bid levels reached during recent months have now given rise to some controversy as to "exactly what is a MS-65 dollar". As has been discussed previously in this column, buyers in a "down" market tend to be more conservative (or, to put it another way, more demanding) than they are in a market which is rising at a fast clip. Thus it is not surprising to find that those who are buying dollars today are very quality conscious. It, therefore, is also not surprising to find that many sellers feel that "average MS-65's" (to "coin a new phrase") will not always trade at the highest bid levels monitored. Apparently it takes a "top end" MS-65 to fill current requirements. This doesn't mean that the strong bidder or two on today's market will only take MS-67 coins---but it does indicate that it takes a "better" MS-65 to realize bid than it did a year or two ago.

By the way, the September, 1981 MONTHLY SUMMARY featured an excellent article by Mr. Maurice Rosen on this subject---which was termed the "Market Premium Factor". We suggest that subscribers take time to re-read this article---it sheds much light on the subject. (Back issues are still available at the regular cost of $2.50 each.)

This Week's Market

CENTS: Advances continue for the Lincoln rolls---ranging this week from some of the early dates (1937-D & S, 1939-S) through such tough later issues as the 1970-S "small date" and 1979-S "type two" rolls. Among those dates which are wanted in quantity (up to one hundred rolls) are 1947-S, 1952-D, 1953-P and 1956-P & D.

NICKELS: Price levels remain unchanged this week for the Buffalo nickel rolls; trading in this area is slow at best---with some interest noted for "gem common date" rolls. A few minus signs will be found scattered among the also very lightly traded Jefferson series. Bargain hunters continue to appear here and there.

In type, adjustments have affected the "type two" three-cent silver pieces in both BU and proof condition---along with Bust half dimes (see page four).

DIMES: Again, several Mercury rolls have reported lower bid/ask ranges. The issues which are available at reduced levels this week include: 1935-P, 1938-P, 1938-S, 1939-S, 1942-S, 1943-S and 1944-D. As in the Buffalo series, there are a few buyers at the moment for the more common P-mint rolls in "original top quality" (but not necessarily in "full bands") condition.

The Roosevelt series has suffered a number of losses this week---with the majority attributed to the further drop in the price of silver bullion. Among the earlier dates affected are: 1946-S, 1947-D, 1947-S and 1950-D.

There are also a few changes for "type". The "reduced size" Bust dime---along with the "legend obverse" Seated Liberty and Barber versions---are a bit lower in MS-65 condition.

QUARTERS: After several weeks of virtual inactivity, a number of Washington rolls have suddenly been offered for sale (several in quantity) at lower prices. Some of the usually tougher rolls are included in these current selling lists---available are: 1940-P, 1941-P, 1941-S, 1942-P, 1942-D, 1943-P, 1943-D, 1946-P, 1946-S and 1947-S. And lower bullion levels have added to this series' woes; with only a couple of exceptions, all of the 1954-64 rolls are also "bargain priced" this week.

The twenty-cent piece in both BU and proof condition has also been adjusted to a slightly lower level. Both versions are now bid at $4750 in strictly graded MS-65 condition.

HALVES: Strong bidding continues for "gem MS-65" examples of every Walking Liberty issue from 1934 thru 1947! Current buyers are sticking with the bid prices recorded a couple of weeks ago---but reports indicate that the desired quantity of coins has yet to be located at these levels. It should be stressed once again that it takes a top quality piece to bring the price on today's market.

The Franklin series is in a very interesting position at the moment. Demand continues for gem MS-65 (and gem MS-65 "full bell lines") singles---and yet a majority of the rolls have drifted lower. This, of course, is a reflection of the fact that today's buyers want gem material---and that interest in "average BU" rolls is minimal.

DOLLARS: A scattering of downward adjustments is again evident across the MS-65 columns---along with three small advances (for 1883-CC, 1884-CC and 1902-O). See comments in "The Market in Depth" column. Several minus signs will also be found among the BU dollar rolls. (At current bargain prices, the buyer should be on the outlook for those "sliders" which often slip into "BU" rolls.)

The Eisenhower series is also rather active---see page six for the week's updates.

PROOF SETS and MINT SETS: Not surprisingly, the 1979-S "type two" proof set has again topped the action in this area. Bid is $160 this week---with numerous sales registered at or near this level. Also appearing on a number of "want lists" is the 1970 mint set---wanted, of course, for the scarce 1970-D half dollar; bid has moved to $27 and large quantities are needed.

COMMEMORATIVES: The page two charts are practically unchanged as both buyer and seller attention is centered on other areas of the market. The usual bargain-hunter is still occasionally encountered---but, more often than not, the coins shipped at below market are something less than a bargain.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $329.30 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

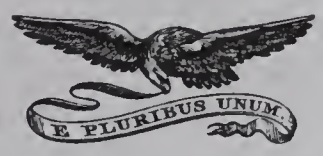
STRICTLY MS-65 WALKERS ENJOY DEMAND AT HIGHER LEVELS

BU Rolls Reflect Numerous Lower Prices As Attention Is Focused Elsewhere

The Market in Depth



ALLEN HARRIMAN

Walking Liberty half dollars in strictly gem MS-65 condition continue to receive a considerable amount of serious bidder attention. And---as the enclosed May issue of the MONTHLY SUMMARY will show---several of the earlier issues are now getting into the act. Apparently the skidding ask levels of recent months have placed at least some of these pre-1934 singles in an attractive price position---the following higher bid prices are now in force: 1916-P - $1235, 1916-D - $1130, 1920-S - $2675, 1929-D - $1030, 1929-S - $1130 and 1933 - $1235. Naturally, in these days of tightened grading standards, only top quality specimens of these (and any other dates) will be accepted.

And the page two chart reflects the higher bids now being monitored for the 1934-40 singles---all of which are sporting plus signs again this week! This latest round of gains has pulled a few coins out of hiding---but certainly not the quantity currently wanted. There are, of course, numerous pieces around which "just miss" the MS-65 category for one reason or another. But, as one major teletype buyer stated, his customers demand the very best and so he must be a "fussy buyer".

By the way, a further check of the MONTHLY SUMMARY will show that all of the 1941-47 Walking Liberty singles are also enjoying higher bids in the MS-65 columns. These advances in particular reflect the current almost exclusive attention which is being paid to gem quality coins. While gem singles in this "short set" group record gains, the corresponding rolls have been slipping in price during recent weeks. As a result of the search for quality, more and more "original" rolls are being picked over---and over---for the better specimens. Even the P-mint rolls which, in years past, could be of exceptional quality, now frequently lack even a single gem specimen. This phenomenon, of course, is already all too familiar among silver dollar rolls. Now the Walking Liberty rolls---along with the Franklins---are suffering the same fate!

"Full bell lines" Franklins also continue to corner a share of current teletype activity. Each of the 1948-63 issues has registered a higher bid in this sought after condition (again, see the enclosed M.S.). Numerous dealers report strong collector/investor demand for these top quality Franklins---with many gem single sets apparently being assembled. Perhaps the most interesting teletype "bid of the week" is the $5000 currently being offered for a single 1953-S Franklin half in "no question MS-67 full bell lines" condition! (No specimens which fit this description have been forth coming.)

This Week's Market

CENTS: Demand continues for numerous dates among the Lincoln rolls even though bid levels have remained unchanged during the past few days. Sales in this area remain relatively light---often deterred due to the inferior quality of many of the rolls available.

Interest in the tougher early date Lincolns in the lower grades is still evident; check the latest bids in the May issue of the MONTHLY SUMMARY.

NICKELS: Lower bid/ask levels have been recorded for four of the Buffalo "short set" rolls---1935-P - $1500/$1625, 1936-P - $1100/$1200, 1936-D - $1500/$1625 and 1937-S - $950/$1025. There is some buyer interest in this area---but mostly of the bargain-hunting variety. Changes are again minimal among the Jeffersons---with the 1944-D roll still one of the more elusive dates.

Extensive "want lists" for Good/better Liberty and earlier Buffalo are regularly monitored---with virtually all bids at currently recorded MONTHLY SUMMARY levels.

DIMES: A few more minus signs will be found scattered across the Mercury roll chart. Affected this week are: 1940-P - $525/$575, 1940-S - $615/$670, 1943-D - $700/$760, 1944-S - $650/$705 and 1945-D - $575/$625. The common P-mint rolls, however, remain steady at $475 bid.

A short run of minus signs has been noted for the 1946-S thru 1948-S Roosevelt rolls. The complete 1946-64 BU roll set is now in a lower $7600/$8200 range---with single BU sets pegged at $155/$170.

QUARTERS: A relatively extensive run of minus signs will be found again this week for the BU Washington rolls. The dates affected this week fall in the 1944-1953 group. It should be noted that such lowering of prices often results only in further bargain-hunting among the dates which a dealer may need---rather than quick sales at the recently lowered prices.

HALVES: Four Walking Liberty rolls have been offered for sale at lower prices this week---the new bid/ask levels are: 1941-S - $7000/$7600, 1942-S - $2600/$2850, 1943-D - $2600/$2850 and 1943-S - $2850/$3100. Strong bidding, however, is evident for gem MS-65 singles; see the extensive comments under "The Market in Depth".

DOLLARS: Numerous "typical" BU dollar rolls continue to be offered at slight discounts. These rolls usually average MS-60/60+---with perhaps a scattering of MS-63's. (Remember to watch out for "sliders".) A few more adjustments have been made in the MS-65 singles columns---see page six.

PROOF SETS and MINT SETS: Prices are lightly mixed across these two charts. Enjoying perhaps the most demand are the 1970-S, 1974-S and 1979-S "type two" (even though slightly lower) proof sets---along with the 1970 mint set. There is also noticeable interest in "gem original" early mint sets in the cardboard mint holders. One or two bidders will currently pay small premiums for the "right" sets.

COMMEMORATIVES: A few more adjustments are scattered across the silver commem charts---virtually all on the lower side (one exception is the still elusive 1933-D Oregon issue). Mild interest is still evident for the eleven gold issues---but current bidders seem content with presently established bid levels.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $334.60 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

MOST AREAS OF MARKET REMAIN SOFT

Comment On Controversy Over MS-65 Dollar Prices

The Market in Depth

ALLEN HARRIMAN

As anyone who has watched the coin market even casually already knows, silver dollars have been without a doubt the steadiest "bright spot" for approximately the last two years. To some extent, dollars were left behind during the peak of the frantic market trading of 1979-early '80---not entirely, of course---but type coins and "dated" material (Seated Liberty, Barber and later) certainly dominated the wild action of those "golden days". Exceptional specimens of rare dates and "wonder" dollars did get into the act---but gem MS-65 examples of the "common" and "scarcer" dates received only a minimum of attention (usually from silver dollar specialists). So, when the bull market came to a surprisingly abrupt (but not unexpected---at least, not by everyone) halt in mid-April of 1980, silver dollars were basically unaffected. After all, bid levels for dollars hadn't doubled, tripled, quadrupled, etc.---so they weren't included in the rush to insure at least some profit (or, in too many cases, a minimized loss) before prices fell even further.

It wasn't long after the initial smoke began to clear a bit that silver dollars began to look good to a number of dealers---and investors. Naturally, those dealers who had always specialized in dollars recognized the opportunities still presented by this popular segment of the market. And, in addition, many dealers who were now effectively out of the type and "dated" areas (or who, at least were facing "famine" after a long and unprecedented "feast") also started to turn to silver dollars---"the only real game in town".

Thus began an approximate two year long orderly and reasonably paced upswing in bid levels for gem dollars (in direct contrast to the confusing and frantic trading experienced in the other areas only months before). All issues in both the Morgan and Peace dollars were included. Obviously some lessons had been learned. The gains which were being recorded for dollars were far more cautious (and far more "healthy") when compared to the often major week after week advances previously experienced in many of the other areas only a year or two before.

Enter into this equation the tightened grading standards which seem to apply naturally to an overall "down market" (vs. the liberalized grading standards of a truly "hot market", when a quick and profitable turnover is more or less assured) and you have an even more complete picture. To put it simply, it began to take a "better" MS-65 to realize full bid than it did in the months and years immediately preceding. (These tightened standards, of course, began to apply to all areas of the market---but virtually all areas except silver dollars were experiencing other difficulties as well.) However, since silver dollars were "alive and well", this phenomenon seemed especially evident at this particular time.

So, we finally come to the real point of this lengthy preamble. After a long period of regular and orderly gains, a few scattered downward adjustments have appeared across the MS-65 dollar charts during the past two or three weeks. But, these are "adjustments"---and, at least at this point, in no way signal the same sort of falling trend which affected the far more out of control (and, perhaps in some instances, out of reason) market in type and related areas of not so long ago. The silver dollar buyers are still there. And, to be fully accurate, there are still buyers---led by one major very discerning bidder---who will pay over bid (and, in some cases, even over ask)---for the "right" specimens (coins we have previously termed "top end" MS-65's). The mild adjustments currently being noted simply appear to be a normal result of a lengthy period of advances. As in any market, time will tell---but, at present, the number of dealers who are actively trading in silver dollars remains high. And reports from numerous sources continue to indicate a scarcity of the "right" coins with which to fill outstanding orders from serious clients. One last comment, investor/collectors have by now been thoroughly educated to demand top quality---and specimens which qualify (some call these MS-65+) continue to enjoy strong demand. The MS-65 bid levels reported on page six, however, are for strictly graded coins---but not for the "pick of the litter".

This Week's Market

CENTS: For the second week in a row bid levels for BU Lincoln rolls are mostly unchanged. Demand for Lincoln rolls remains high, however. The 1970-S small date and 1979-S Proof (both type) rolls were higher this week. Several of the copper type issues were lower this week (see page four). Several want lists for the "earlier" (1936 to 1953) Proof Lincolns were noted on the teletype circuits.

NICKELS: Both Buffalo and Jefferson rolls were quiet this week. Bid levels for the 1937-D and 1937-S rolls edged lower to $900 and $925 respectively. Action in Jefferson rolls was virtually non-existent.

DIMES: A few more minuses are scattered thru the Mercury Dime roll charts. While trading is light, there is some definite interest in Roosevelt rolls. The 1948-P and 1949-P rolls were lower, while bid for 1954-S rolls edged up to $50. Several of the rarer type issues dropped a little more this week (see page four).

QUARTERS: Washington rolls continued to drift lower this week. Even the very rare 1934-P roll was down a bit (bid now $2200). At this point, there seems to be very little interest in this now moderately priced series. Bucking the trend is the 1979-S type two roll which was bid at a higher $235.

HALVES: Several BU Walkers rolls were offered at lower prices this week. The 1942-S roll is down to $2500 bid. Both the 1944-D and 1945-D rolls are bid at a lower $2100. The 1946-D is also lower now bid $1350. Gem MS-65 singles remain in demand. Franklin rolls were somewhat inactive as a few issues drifted lower. "Full bell lines" examples are still being actively pursued by numerous bidders.

DOLLARS: The grading controversy rages on (see Market in Depth). There were a few minor adjustments for MS-65 singles this week (see page six). While the dollar roll market is somewhat soft, the S-mint rolls are enjoying strong demand and have moved up a bit this week.

PROOF SETS and MINT SETS: There is good demand for most proof sets and some of the mint sets too! The 1979 type two proof set dropped slightly this week (bid is now $150) but action is intense and buyers seem quite willing.

COMMEMORATIVES: Silver commemoratives are still out of favor with most teletype bidders. While gold commemoratives have also slowed down a little there is still active bidding for all of the issues, particularly in XF/AU and MS-60 condition.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $328.10 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather than "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices

1979-S "TYPE TWO" ROLLS CONTINUE TO ADJUST

Original "Double" Mint Sets Of 1947-58 Not Easy To Locate

The Market in Depth

ALLEN HARRIMAN

Though trading of the popular 1979-S "type two" proof set has slowed in comparison to the level of a few weeks ago, the current activity surrounding this set must still be termed as somewhat "volatile". The various bidders---and sellers---are seldom "together" on their prices. It is not at all unusual to see concurrent teletype messages in which a particular buyer is offering to pay more than another dealer is selling for. The "range" of these disparate prices, however, is certainly not as wide as it was when this set "took off" a couple of months ago. In fact, when all of the past week's trading was taken into consideration, the bid/ask level has remained at $150/$162. But it should be pointed out that specific sales during the past few days have been recorded from a low of $145 to as high as $165.

The corresponding "type two" rolls continue to "adjust"---presumably in relation to actual availability. The Lincoln cents have moved higher---with at least one dealer paying $6 each for the quantity he needs. The Jeffersons and Roosevelts, on the other hand, have both edged lower---and both seem to be easier to locate than the Washington quarters (which have advanced to $250 bid). The Kennedy halves, not surprisingly, remain the most active of six the denominations---and it is this roll which records the most varying teletype bid/ask levels from day to day (or hour to hour). But, as with the set, bid has remained unchanged at $850---even though the numerous buyers and sellers seem somewhat confused as to exactly what level is most appropriate. This roll, as readers know, has registered by far the most impressive gains during the weeks just past. And, last, the Anthony dollars---which are now in a slightly lower $1850/$2000 range. This roll (which was the first to attract overall attention) has perhaps "settled down" to a greater extent than the other five.

A few words about the 1947-58 "double" mint sets: prices for these sets have not fallen in relation to the pro-rated roll prices as was often the cases in times past. This is obviously due to the fact that these sets in "original" condition and in the "original" mint holders are not as plentiful as mintage figures would indicate. Many of these sets have been broken up through the years---often to remove the beautifully toned singles which are contained (especially the half dollars). Put together or reassembled sets do not bring the bid prices reported---even though they are frequently offered at these levels. On the other-hand, there are a few discerning bidders who will pay a bit over current bid for "strictly original" sets--and finding the quantities needed is apparently not at all easy. When buying in this area it is suggested that the purchaser make certain that sets are obtained which include only the original coins as inserted by the mint. After all, it is no trick to "assemble" any of these pre-1959 sets from singles which may be lying around! Today's buyers definitely do not want such sets.

This Week's Market

CENTS: With scattered exceptions (1944-P, 1945-P, 1946-P, 1947-D and a few later dates), bid/ask levels for choice BU Lincoln rolls are again unchanged. Considerable interest does remain evident, however, for quantities of several of the pre-1943 issues. The 1979-S "type two" roll has advanced to $290 bid---with transactions noted as high as $300.

NICKELS: Three more minus signs will be found among the Buffalo "short set" rolls: 1935-S - $2300/$2500, 1937-P - $725/$790 and 1938-D - $675/$735. And two low mintage (and sometimes "popular") Jefferson rolls are also lower this week: 1943-D - $130/$141 and 1950-D - $275/$300. There are two or three potential buyers for many dates in this quiet series---but they generally hope to purchase gem rolls at truly bargain prices.

DIMES: Lower teletype selling levels (along with lower bourse table prices) have again hit the 1934-45 Mercuries. The earlier singles (1934 thru 1938) have been reduced on this week's chart (strictly MS-65---but not "full bands" specimens) along with a majority of the 1940-45 rolls. These new price tags haven't yet created much buyer interest. A few more adjustments have also been recorded for the Roosevelts---see page three.

QUARTERS: A fair amount of bargain-hunting is regularly monitored for the 1932-40 Washington singles in strict gem MS-65 condition. These current bidders are obviously interested in "picking off" the occasional gem which might be available at well below present market levels---levels which have already been lowered substantially over the past year or so. The 1941 and later rolls remain virtually unchanged---with an advance to $250 bid recorded for the 1979-S "type two".

HALVES: Ah---a bright spot in the market! Again the 1934-40 Walking Liberty singles have moved ahead a bit---with quantities wanted (as long as today's strict grading standards are applied). In addition, at least one major bidder will already pay a little over the May MONTHLY SUMMARY prices for all of the 1941-47 singles in the same top quality condition.

Franklin rolls continue to experience some difficulty. While interest in gem singles remains very evident---those who are buying "typical" BU rolls are currently rather few and far between. Thus, a few more issues have drifted lower this week.

DOLLARS: The MS-65's---in both series---remain in a somewhat confusing state. As stated previously, there are bidders who are offering to pay at least bid (and frequently over) for the "right" MS-65 specimens. While, at the same time, there are numerous sellers at below bid. Grading, of course, is the problem. The sellers say that the buyers only want MS-65+ coins; the buyers continue to say that the sellers are "pushing" their MS-63+ coins! (Re-reading last week's column on this subject might be in order.)

PROOF SETS and MINT SETS: A number of minor changes have been registered in both of these areas---about evenly divided between gains and losses. Among the most sought after issues are the 1970-S and 1982-S proof sets along with the 1970 and 1973 mint sets. The 1979-S "type two" set remains in a relatively volatile position---see comments in "The Market in Depth".

COMMEMORATIVES: Still one of the more quiet areas of the market. Very few of the current teletype messages are concerned with commems---either buying or selling. But of course, some of the perennial bargain-hunting is always evident.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $317.30 per ounce.

THE COIN DEALER NEWSLETTER

[illegible] the active coin market on a weekly basis. Under the present system it is impossible to monitor all transactions. It offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer to dealer transactions. As an investor you may place your buy and sell orders through a dealer for a fee as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch. 2 column inches maximum
Advertising space is limited, ads will be placed in first possible edition.

the COIN DEALER newsletter inc

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem"
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices, "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

1982-S PROOF SETS ON THE MOVE!

1934-47 Walking Liberties And Silver Dollars Wanted In Gem Condition

The Market in Depth

ALLEN HARRIMAN

The 1982-S proof set continues to receive a considerable amount of bidder attention across the various teletype circuits. Bid has moved to $23 this week. Quantities are wanted by several bidders---and the price tags attached to those sets which are available have a way of staying just ahead of advancing bid levels. There is an excellent chance that no 1982 dated circulation strike Kennedy halves will be minted---but no "official" decision has yet apparently been reached. This, of course, would place the 1982-S proof in the unique position of being the only half dollar available for a particular year. (There are two 1970 dated halves, don't forget.)

Then, too, it appears that there will be two types of 1982-S Jefferson nickel proofs (along with two types of circulation strikes). Information released by the Mint indicates a change on the reverse was made (due to the failure of the master hub) around mid-April---and that all of the proof sets delivered so far are of the "type one" variety. The second type should begin appearing any time now. Whether or not these two types "catch on" remains to be seen. Meanwhile, however, two or three dealers are apparently "banking" on the possibility. Bid for the 1982-S Jefferson proof roll is pegged at $100 this week---but at least one dealer will already pay $150! Thus we urge readers to keep an eye on this roll. The volatility could continue for some time---and pinpointing a specific bid/ask level will probably be quite difficult during the next several weeks!

By the way, the 1979-S "type two" proof set seems to have "peaked" once again. Bid is registered at $142.50 this week---and the changes among the individual rolls fall only into the "adjustment" category. Although buyer (and seller) interest continues to be noted, trading during the past few days should be termed "moderate".

The Kennedy half dollar series is currently in an interesting position---at least when considering the bid levels for roll sets and single sets in relation to the total of the bids for the forty-nine individual rolls. Far more often than not, bids for roll sets is somewhat below this total---but not so for the Kennedy series at the moment. Presently, bid for the rolls when added together comes to $3373. However, the already assembled roll set is receiving bids of $3450---and single sets are even further ahead with a new bid of $180 this week (twenty single sets would work out to $3600). The apparent reason for the relationship between these bid levels is that those dealers who are trying to buy have customers ready and waiting for the sets (and even roll sets) but they do not want to stock all of the rolls separately. The lower priced rolls, of course, are usually available only in quantity---ten or twenty rolls to bags---within current bid/ask ranges. However, few if any dealers are in the mood to ship just one or two rolls due to packaging, postage and bookkeeping costs. Thus the premium for sets---someone else has already done most of the work!

By the way, readers may have already noticed that the 1974-S proof Kennedy roll has been recording advances during the past few weeks. Bid has moved to $45 this week---and quantities are wanted. Meanwhile, however, the 1973-S roll has remained at $35 bid. Yet both of the corresponding proof sets are bid at the same $7.75. The reason for this strong interest in the later of the two dates isn't clear (the two Eisenhower proof rolls have been in the reverse position for a long time now---again without a "reason" being evident.)

This Week's Market

CENTS: Although mild interest continues for several of the pre-1943 issues, bid levels have again remained unchanged. Also, a few sellers are appearing here and there. Lower prices have been recorded for several of the later Lincoln issues---with bag and multi-bag quantities of some dates available. The 1979-S "type one" roll, however, is wanted---now at a higher $150.

In "type", several minus signs will be noted among the copper issues---from half cents thru two-cent pieces. Check page four carefully.

NICKELS: A few Jefferson rolls are a bit lower this week: 1938-P - $76/$82; 1938-D - $245/$265; 1938-S - $290/$315 and 1944-D - $365/$400. However, more concerted "bargain hunting" is now noted in this series---with at least one below-market "want list" including practically all dates in the "5%-10% off" area. Few really choice rolls have been located.

DIMES: The late P-mint Mercury rolls have been adjusted downward---mostly to a $450/$490 range (the 1945-P roll always seems to lag behind just a bit). Also lower this week are the following better date rolls: 1938-S - $1600/$1750; 1939-S - $1825/$2000; 1940-D - $1400/$1525 and 1941-D - $950/$1025. Interest in other than MS-65 "full bands" singles remains very light.

Bust half dimes and dimes have moved lower in all three unciruclated grades---again, see page four.

QUARTERS: There isn't really very much to report for the Washingtons. A couple of dealers continue to look for "bargains" among the pre-1941 singles---but more often than not they receive coins which do not quite meet today's exacting standards for strict MS-65. The 1941-64 rolls remain unchanged---with very little attention. Several changes will also be found among the uncirculated and proof "type" issues.

HALVES: One major buyer is still regularly running teletype "want lists" which cover all of the 1934-47 Walking Liberty halves---in strictly gem MS-65 condition, of course. In contrast, however, "typical" BU rolls of the common P-mint issues have been adjusted to a lower $1200/$1300 level. Interest in anything less than gem quality is very light.

A majority of the later Franklin rolls (1955-63) are also lower---again with nearly all of the current bidding noted for MS-65 singles---at or slightly above the May MONTHLY SUMMARY levels.

DOLLARS: Some of the S-mint rolls are slightly higher this week (along with the corresponding MS-60 and MS-63 singles). And the most common P-mint and O-mint rolls have edged a bit lower---again with the less than MS-65 singles reflecting the same change. Bidding continues to be monitored for strictly gem MS-65 singles in both series---at current "bid" (and often higher for the "right" coin).

PROOF SETS: The 1982-S proof set has cornered most of the action---see "The Market in Depth". A number of further adjustments have been in both of these areas; several of the later silver mint sets are lower due to skidding bullion levels. Sales are generally moderate.

COMMEMORATIVES: Activity in this area remains at a virtual standstill. This does not mean that there is a plentiful supply of strictly graded MS-65 specimens for sale---there isn't! (There is, however, enough of the "just miss" variety to go around.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $336.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions of offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES
$25.00 per column inch, 2 column inches maximum
Advertising space is limited; ads will be placed in first possible edition.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

BULLION PRICES CONTINUE TO SLIDE

Major Lowering of Price Levels Registered for Type Material

The Market in Depth

ALLEN HARRIMAN

Not unexpectedly, falling bullion prices have had a dampening effect upon the market as a whole. This influence---coupled with the latest teletype offerings and the trading levels at the recently concluded Long Beach (Calif.) Convention---has resulted in another very comprehensive lowering of bid/ask levels for type coins. These latest reduced prices have been registered for the very scarce thru the relatively plentiful types--and for several XF and AU's thru MS-65 (BU and proof). At present, the type material "under fire" falls basically into two groups---the less-than-gem MS-65 coins and all other categories. First, the less-than-gem. There is more than enough MS-63 and lower grade pieces to go around---and encouraging sales with "bargain" prices is only partly successful. That is, unless the "bargain" is a true bargain! In addition, of course, there are those coins in this group which are purchased because the buyer either feels that they actually undergraded---or he thinks that they can be re-sold as a higher grade. But, to repeat, coins in this group are generally plentiful---and it usually takes some hard bargaining to finalize a sale.

Then there is the gem MS-65 group. Coins in this category are not plentiful---especially in view of today's very strict grading standards. There are numerous dealers who are interested in buying material of this category. But (and here comes the paradox), these potential buyers still drive hard bargains--and, in most cases, sellers must still discount even their MS-65 coins in order to make sales. In short, it is definitely a buyers market! The number of cash-in-hand buyers (dealers, investors and collectors) may well be at an all-time low.

It continues to be somewhat difficult to pinpoint exact bid/ask levels for the lower priced proof sets and mint sets. The difficulty lies in the fact that "mixed lots" are frequently listed for sale "at bid" (or, sometimes, at a slight discount). The only problem with these listings is that the buyer must take the entire group of sets---which usually includes more issues that are not needed than those which are. And then, on the otherhand, dealers who need specific sets usually offer to "pay bid" (or, sometimes, a bit more) for the wanted issues. All of the variations, of course, are minor in relation to the present bid/ask ranges---but those buyers who are willing to take "mixed lots" can currently save at least a little on the overall price.

By the way, it remains difficult to locate "original" double mint sets---1947 thru 1958. There are only two or three teletype dealers who are bidding in this area---but the number of available sets which fit the buyers' requirements is very limited. The main "requirement" is that all of the coins in the set must be those which were placed there by the Mint (the toning is usually a clue as to whether a set has been "assembled"). The original cardboard holder is also a must---but this requirement is a little harder to police (original coins can be placed in any Mint holder---they weren't dated).

PLEASE NOTE that the June issue of the MONTHLY SUMMARY will accompany next week's regular mailing. Featured will be a important and timely article on the valuation of silver dollars!

This Week's Market

CENTS: Another extensive batch of minus signs will be found among the page four copper type coin listings this week. Affected are both the BU and proof issues---in MS-60, MS-63 and MS-65 condition. Also reflecting lower prices are a number of BU Lincoln rolls---ranging in date from 1934 thru 1982; see pages two and three.

NICKELS: The two most plentiful BU Buffalo rolls have again been offered for sale at reduced prices: 1937-P - $700/$760 and 1938-D - $625/$680. Activity in this series remains at a virtual standstill---except for the occasional 38-D which may be picked off at a true bargain price. In the Jefferson group, the "mysterious" 1982-S Jefferson roll is now bid at $150---with bidders still apparently assuming that they will receive "type one" coins. (See the discussion regarding the 1982 Jeffersons in last week's column.)

Lower bid/ask levels among the MS-65 uncirculated type coins include: Shield Nickels (with rays) - $2000/$2250, Shield Nickels (no rays) - $750/$835 and Buffalo Nickels (type one) - $135/$150.

DIMES: Minus signs also continue to plague the Mercury rolls. Listed in lower bid/ask ranges this week are nearly all of the 1934-45 P-mint issues; buyer interest remains in the "bargain hunting" category. In addition to the later bullion-related dates, four other Roosevelt rolls have registered lower prices this week: 1947-D - $215/$235, 1948-D - $250/$272, 1948-S - $220/$240 and 1955-P - $64/$69.

Proof half-dimes and dimes---from the "stars obverse" S.L. issues thru the Barbers---are all lower in MS-60, MS-63 and MS-65 condition. A thorough look at the page four charts is probably in order!

QUARTERS: Quite a group of reduced price levels will also be noted among the quarter "types"---ranging from the early Bust issues thru the Standing Liberties. The majority of the losses in this area has been registered by the BU's---in all three grade categories.

As with the Roosevelts, skidding bullion levels have only slightly affected the late BU Washington rolls---at least for the moment. The only better dates which are lower this week are: 1944-P - $240/$262, 1945-P - $190/$205 and 1946-P - $160/$175.

HALVES: Walking Liberty singles (in strictly gem MS-65 condition) continue to be one of the stronger areas of the market. The 1934-40 issues remain elusive at current bid levels---and offers to pay "over bid" (the May MONTHLY SUMMARY levels) for the 1941-47 singles are meeting with only limited success. A few of the W.L. rolls, however, have again edged a bit lower. Changes are minimal among the lightly traded Franklins; buyer attention remains focused upon gem singles.

Several downward adjustments have been recorded for the "type" halves too---again, check the charts for details.

DOLLARS: Lower bullion prices have had their effect upon the more common BU dollar rolls---1883/85-O, 1885/87-P, 1904-O and 1921/23-P. Interest, however, is still evident at current levels for the 1878/82-S rolls. Several of the Peace dollar singles have reflected lower bid/ask prices this week. It again must be pointed out that there are two or three teletype bidders who continue to offer "over bid" for the right gem MS-65 singles in both series.

The "blue" and "brown" Ikes (40% silver BU's and proofs) are all lower---with small mixed lots frequently listed for sale. Below market bidding is regularly monitored.

PROOF SETS and MINT SETS: The 1982-S set has pulled back just a little---trading has been in a $21.75/$23.50 range during the past day or two. Further adjustments are likely to occur as more sets are delivered. The 1979-S "type two" set has also moved lower---with light to moderate activity now noted in a $130/$141.50 range. Several other issues in both groups are available at slightly lower prices.

COMMEMORATIVES: Some bargain-hunting bidding continues to be monitored---with questionable results. As has been mentioned previously, bargain-hunting often turns up coins which "just miss"! Buyer interest (at present levels) is noted for the eleven gold commems---particularly in MS-60 and MS-63 condition.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at $317.50 per ounce.

COMMEMORATIVES

MS-60 coins are "average UNC"—they may have bag marks or handling marks (but no wear) and may not have full luster.
MS-63 coins may have minor marks or a slight weakness of strike—they are "choice" rather then "gem".
MS-65 coins are well struck with a minimum of abrasions—they may be brilliant or have original toning.

BU ROLLS

* Refer to "Early Singles" above

The following prices are for typical rolls of the dates involved. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

DEALERS

Need a Single Coin or Stamp?

Don't let your customer leave your store dissatisfied. Especially in the collector market of today.

We fill dealer orders for circ or BU coins, either singles or rolls, so don't fail to fill that set of Lincolns or Washingtons for lack of a coin in your inventory. We can fill your needs probably. Reasonably, too. The same goes for U.S. Paper money, Colonial, Nationals, BEP sheets, Error notes & Radars. We stock mint and used U.S. stamps, in Avg or F or VF hinged or NH. We also handle the Disney stamp issues; other collector items we have available are baseball cards and sets, postcards, Rockwell & Hummel figurines. We also have 400-500 different collector plates from B & G to Hummel to Rockwell, etc. so advise your needs---you can't lose if you try to satisfy your customer needs.

The collectors are back in the stores - so work with them.

Please write or call in your needs, or stop in our store in the Berlin Mart in Berlin, N.J.
